ISV-certified applications.

Higher Storage and Memory

The 2400Mhz DDR4 memory - up to 384GB - has a higher bandwidth than the previous generation, for a faster response. And bigger, faster storage options - including up-to-1TB M.2 PCIe SSD with RAID capability and up-to-8TB 3.5' SATA HDDs - can be configured for up to 48TB total storage.

The ThinkStation P710 can handle even the most processor-intensive ISV-certified applications

Unparalleled Versatility

The ThinkStation P710 features a superior modular design, including Flex Trays holding up to two drives per bay for versatility. Configure only the components you need, for the ultimate in usability and savings.

Steadfast Reliability

Patented Tri-Channel Cooling ensures each component receives cool air, using a unique air baffle. The ThinkStation P710 uses fewer fans and stays cooler than the competition, so it continues to run for less downtime and a higher bottom line.

Ease of Use

Intuitive red touch points guide you to quick and easy component changes - even to the motherboard and swappable power supply - without having to use a single tool. And best-of-breed cable management means no wires or plugs, and superior serviceability.
