

32HFL3010W/12

Philips 32HFL3010W/12 32" Professional TV

Product Overview

Philips 32HFL3010W/12 32" Professional TV, RF, black, LED HD, HDMI, SXP, DVB-T2, CMND (Control & HTML5-content management system), low power consumption, USB, USB Cloning TVs, menu locking, volume control, MyChoice payment solution

Specifications

Features:

LED TV for images with incredible contrast

With LED backlight you can enjoy low power consumption and beautiful lines combined with high brightness, incredible contrast and vibrant colours.

MyChoice compatibility for recurring revenues

MyChoice offers a simple and low-cost way to offer your guests premium TV channels. At the same time it delivers an additional revenue stream which allows you to recover your initial TV investment.

SmartInstall for easy remote installation and maintenance

SmartInstall makes the installation and maintenance of your TVs effortless. With a simple to use web tool, you can now remotely configure and install your TVs without visiting any rooms! This saves you time and makes sure your guests are not disturbed. Whether it is updating the hotel info pages or installing new channels, SmartInstall can handle all.

SmartInfo for branded, interactive healthcare info pages

SmartInfo allows you to easily provide hospital or healthcare information to your patients. Your patients have access to this interactive hospital webpage even when the TV is not connected to your intranet or internet. You can change the information regularly and easily keep your patients up to date with all the latest information.

Serial Xpress Protocol Easy for interactive systems

With Serial Xpress Protocol Easy the TV can be connected to external decoders and set-top boxes from all major interactive system providers.

Including white remote control designed for healthcare usage

This TV comes with a stylish white remote control specifically designed for healthcare usage. The solid surface and smooth back of the remote allow it to be easily cleaned and disinfected. In addition, low battery check and anti-theft battery provision

are features which can contribute to efficient hospital operations.

Full Hotel, Healthcare and Prison Modes

All required features for professional use in environments where more is required than in a living room. From volume and menu locking to more rigorous material testing, energy saving, anti-theft remote controls and dedicated Healthcare and Prison features to allow for niche market applications.

Multi remote control avoids interference with other TVs

The multi remote control feature ensures that each remote only operates one TV. There can be up to 14 different TVs in one room without any mutual interference of the remote controls.

Nurse-call compatibility optimised for the Healthcare sector

Nurse-call system compatibility makes Philips Healthcare TVs a highly integrated tool that provides not only entertainment options for the user/patient but also gives convenient access to help in medical emergencies.

Additional headphone connection for personal listening

This speaker system features an additional headphone connection. Connect your own headphones for a more personal listening experience whenever you want it.

Prevent unauthorised use by joystick control locking

By disabling or enabling joystick control locking, the administrator can prevent unauthorised use of the TV via the joystick, saving the hotelier overheads.

Eco-friendly design and flame-retardant housing

Sustainability is integral to the way Philips does business. Philips TVs are designed and produced according to our EcoDesign principles aimed at minimising overall environmental impact, through lower power consumption, removal of hazardous substances, lower weight, more efficient packaging and better recyclability. Philips TVs also have a special housing of flame-retardant material. Independent tests carried out by emergency fire services have shown that whereas TVs can sometimes intensify fires caused by external sources, Philips TVs will not contribute to a fire.

Low power consumption

Philips TVs are designed to minimise power consumption. This will not only reduce environmental impact but also lower operating costs.

Specifications:

Picture/Display	
Display	LED HD TV
Diagonal screen size (metric)	80 cm
Diagonal screen size (inch)	32 inch
