Specifications

Features:

- HDR 10
- Google TV
- Ok Google
- Dolby Audio
- Dynamic Color Enhancement
- HDMI 2.1
- AIPQ2.0
- EDGELESS DESIGN

The entertainment you love with the help from Google.

Watch 700,000+ movies and TV episodes all in one place. A Google TV brings your favorite contents from across your apps and subscriptions and organizes them just for you.

Your TV is more helpful than ever

Use your voice to find movies, stream apps, play music, and control the TV. Ask Google to find a specific title, search by genre, or get personalized recommendations by saying, "what should I watch?" Even get answers like sports scores, control smart home devices, and more.

See details in a detail

High Dynamic Range (HDR), the latest standard for UHD contents, provides a superior experience with striking brightness, exceptional shadow details and vivid colours. Sit still and enjoy incredible picture details as the film makers intended.

HDR 10

With the stunning 4K display that applies the latest open high-dynamic-range video standard, dynamic tone mapping optimizes picture quality, and range of tones, brightness, and contrast are considerably enhanced on a frame-by-frame basis. More nuanced content makes your screening experience most entertaining and enjoyable.

Dynamic Color Enhancement

Developed exclusively by TCL, Dynamic Color Enhancement is designed to optimize color vibrancy automatically. A proprietary algorithm expands traditional palette limitations - providing a more vibrant, premium video experience.

AIPQ 2.0

A new quad-core processor is built to optimizing overall hardware and software performance, enhancing the entertaining experience. A chipset enabling TCL algorithm processes content in real time, detecting environment and upscaling display and audio. Pictures are optimized according to content, so oceans appear bluer, and rainforests more lush. Meanwhile, audio quality is compensated dynamically based on volume, eliminating distortion of signal and speakers, and providing a more authentic auditory experience at any sound level.

Immersive Dolby Audio

Enjoy ultra realistic, multi-dimensional sound with Dolby Audio. Designed to immerse yourself in every scene - with incredible clarity, crisper dialogue, and great detail. From sports games to your favorite TV series, entertainment has never sounded better.

Low Input Lag and Quick Response

For gamers, a responsive TV is just as important as one with a good picture. With the HDMI2.1, you'll have an experience of the lowest latency and the best picture settings for gaming.

More Screen, Less Limits

P635 3-sided edgeless-less design allows a full-screen and wider visible viewing experience, which just feels right amongst all the ac.
