Promate Primeshield.Ip5 Premium Ultra-Thin Tempered Optical Glass Screen Protector

Product Overview

Promate Primeshield.Ip5 Premium Ultra-Thin Tempered Optical Glass Screen Protector For iPhone 5 (Phone not included)

Specifications

Overview:

primeShield.IP5 is an ultra-tough high density tempered glass screen protector for iPhone 5/5s. primeShield.IP5 is constructed using an innovative scratch resistant tempered glass material which is five times stronger than regular glass and can resist scratches even from knives and keys. The rounded edges offer a more precise fit to your iPhone 5/5s. The self-absorbed adhesive side of primeShield.IP5 is coated with an anti-shatter silicon film that ensures protection to your device even if the glass shatters and also assists in easy installation of the screen protector. This screen protector is 0.33mm thick coupled with an oleophobic coating that provides premium protection from smudges and fingerprints with no loss in touch screen sensitivity. primeShield.IP5 is made of an optical graded PET film that enhances colour and provides a sharper view. The optical graded PET film has a higher light transmittance than normal grade PET film and thus provides protection from eye fatigue due to extensive and continuous use of your iPhone. Promate primeShield.IP5 is an obvious choice when it comes to optimum screen protection.
