Product Overview

Manhattan CPU Cooler P4 up to 2.4GHZ Retail Box

Specifications

Overview:

Computers and their internal components can generate large amounts of heat during operation. Without reliable and efficient cooling, this heat can contribute to poor performance and lead to a shorter service life. MANHATTAN CPU Coolers conduct and dissipate heat away from processors to reduce the risk of heat damage and help them operate at safe temperatures and peak levels.

Features:

- Lightweight, rugged aluminum and copper heat sink construction provides effective thermal conductivity and dissipation
- High-efficiency fan with ball bearing delivers quiet, reliable cooling
- Helps protect Intel P4 processors from heat damage
- Easy installation - ideal for new systems, upgrades and replacements
