Port 901235 Security cable Universal switchable lock combination

Product Overview

Port 901235 Security cable Universal switchable lock combination, Adaptable fitting for Standard / Nano / Noble wedge, Up to 10000 possible combinations with Reset Function, Rotary head for Easy Access to the combination, Lock Diameter of 12.5 mm, cable length of 2 m, Made with Steel Braided cable and Zinc Alloy Body with Nickel plating, Transparent PVC sheathing for optimal durability

Specifications

Overview Summary:

Secure your valuable equipment with the Port Security Cable Universal Switchable Lock Combination, designed specifically for professionals in South Africa who demand reliable protection. This robust safety cable features an adaptable fitting compatible with Standard, Nano, and Noble Wedge notches, ensuring it works seamlessly with laptops, screens, overhead projectors, and other devices across your business or home office setup.

With up to 10,000 possible combination codes and a user-friendly rotary head for easy access, this cable offers advanced security against theft while maintaining practicality. Crafted from high-quality zinc alloy, nickel-plated steel with PVC sheathing, it provides superior resistance to cutting and tearing attempts. Protect your investment today by buying now and experience the peace of mind that comes with durable, universal equipment protection.

Performance tier: High

Uses: Laptop security, screen protection, projector safety, office asset management, retail display security

Overview:

Protect your valuable equipment with the Port Security Cable Universal Switchable Lock Combination, part number 901235. This robust security solution is engineered to safeguard laptops, monitors, and projectors against theft using a high-strength design that resists cutting and tampering. By combining universal compatibility with an advanced locking mechanism, it offers peace of mind for both professional offices and home workspaces.

Description:

The Port Security Cable Universal Switchable Lock Combination is designed to provide maximum protection without compromising on ease of use. It features a versatile locking system that adapts seamlessly to various device security notches, ensuring your equipment stays secure in any environment. With over 10,000 possible combination codes and an ergonomic rotary head, this cable delivers superior reliability and user-friendly operation.

Features:

Universal Compatibility for All Devices
This security cable is built to work with a wide range of devices thanks to its adaptable fitting system. Whether your device features standard notches, Nano slots, or Noble WedgeTM safety points, this lock provides total flexibility. It effectively secures laptops, screens, overhead projectors, and other portable electronics, making it an essential accessory for anyone needing reliable asset protection.

Advanced Security with Customizable Codes
Say goodbye to generic keys and hello to personalized security. The switchable lock combination system allows you to set your own unique code from up to 10,000 possible combinations. This reset function ensures that only you have access to the lock, providing an optimal defense against break-in attempts while maintaining high convenience for authorized users.

Durable Construction and Premium Materials
Built to withstand rigorous use and external aggression, this cable is crafted from ultra-resistant steel braiding encased in transparent PVC sheathing. The locking mechanism itself features a zinc alloy body with nickel plating, guaranteeing increased resistance against cutting tools and tearing attempts. This robust design ensures long-lasting performance for your security needs.

Ergonomic Design for Easy Operation
The rotary head on this safety cable is designed with user convenience in mind. Its ergonomic structure makes it significantly easier to read the combination settings, allowing for intuitive locking and unlocking processes. This thoughtful design reduces friction during daily use while maintaining the high security standards required for protecting valuable assets.

Key Specifications

- Cable length: 2 meters for flexible placement
- Lock diameter: 12.5 mm for secure attachment
- Total product weight: 107 g
- Material composition: Steel, Zinc, Nickel, and PVC
- Packaging type: Bulk box
- Minimum order quantity (PCB): 50 units

What's in the Box

- 1 Security Cable Universal Switchable Lock Combination

- 1 User manual for setup and usage instructions

FAQ

What types of devices can this security cable protect?
This universal combination safety cable is designed to effectively secure laptops, screens, overhead projectors, and other equipment equipped with a standard or specialized security notch.

Does the lock work with different types of device notches?
Yes, the adaptable fitting ensures maximum compatibility by working with Standard, Nano, and Noble WedgeTM safety notches for total flexibility.

How secure is the combination locking system?
The cable features a programmable lock with up to 10,000 possible combinations and includes a reset function to ensure optimal protection against break-in attempts.

What materials are used for durability?
The unit is constructed from robust zinc alloy with nickel plating and features an ultra-resistant steel braided cable covered in transparent PVC sheathing for high resistance to cutting and tearing.

Can I easily read the combination code?
The ergonomic design includes a rotary head that rotates for easy access, making it intuitive to read the numbers when locking or unlocking the device.
