Ajax Keypad Jeweller - Wireless White Indoor Keypad

Product Overview

Ajax Keypad Jeweller - Wireless White Indoor Keypad, Up to 2 years of Battery Life, Remote control via App, Panic Button, Two-stage arming, 1948490-12-WH1

Specifications

Overview Summary:

The Ajax Keypad Jeweller Wireless White Indoor Keypad is a compact and reliable security solution for homes and offices. Designed for easy indoor installation, it allows users to arm and disarm their Ajax security system quickly. With features like remote control via the mobile app, a panic button, and up to 2 years of battery life, this keypad combines convenience with high-level security. Ideal for immediate home protection, you can set access codes for multiple users without creating individual accounts, making it perfect for families or small offices. Shop now to upgrade your security effortlessly.

Performance tier:High

Uses:Home security, office security, remote arming/disarming, panic alert, access management

Overview:

Ajax Keypad Jeweller - Wireless White Indoor Keypad

The Ajax Keypad Jeweller offers seamless control of your security system with its wireless touch interface. Designed for indoor use near entry points, it allows fast arming and disarming of your Ajax system. With advanced communication encryption and jamming detection, this keypad ensures reliable protection while providing alerts for tampering or unauthorized access attempts. Users can easily manage multiple security codes, including duress codes, and receive instant notifications through the mobile app. Installation is straightforward, with the battery pre-installed and setup completed in minutes.

Description:

The Ajax Keypad Jeweller combines convenience and security in a compact, wireless design. It supports up to 99 individual access codes, including a hidden duress code that can alert your Central Monitoring Station if needed. The keypad detects tampering, blocks itself after multiple incorrect entries, and communicates securely with your hub using Jeweller radio technology. With up to two years of battery life, intuitive mobile app integration, and quick installation using SmartBracket, it offers a reliable, user-friendly solution for homes or offices.

Features:

How it works

Users enter a digital code to arm or disarm the system. The keypad provides visual feedback on system status, detects communication failures, and includes an alarm button for emergency alerts. The device automatically blocks itself after too many incorrect entries to prevent unauthorized access.

Managing access for visitors and staff

The keypad allows temporary or permanent access codes for people not registered in the system, such as cleaning staff or realtors. You can create, edit, and delete codes remotely, assign unique IDs to each user, and receive notifications whenever codes are added or removed.

Easy installation and setup

The keypad comes ready to use with the battery pre-installed. Simply connect it to the hub via the mobile app and mount it on the SmartBracket. The process takes only a few minutes, with no additional disassembly required.

Technical details

- Type: Wireless touch keypad
- Indoor installation
- Compatible with all Ajax hubs and range extenders

ComX Computers

Product Specification Sheet

- Supports duress and user passcodes
- Protects against code guessing
- Visual arming/disarming indication
- Power: 4 AA batteries, up to 2 years life
- Jeweller radio range: up to 1,700 m in open space
- Two-way device communication
- Radio frequencies: 866.0-866.5 MHz, 868.0-868.6 MHz, 868.7-869.2 MHz, 905.0-926.5 MHz, 915.85-926.5 MHz, 921.0-922.0 MHz (region dependent)
- Self-adjusting RF output power: up to 20 mW
- Dynamic key encryption
- Polling interval: 12-300 s
- Temperature sensor included, operating -10degrees C to +40degrees C, humidity up to 75%
- Anti-sabotage, tamper, and jamming detection
- Remote setup and testing available
- Dimensions: 150 x 103 x 14 mm, Weight: 197 g
- Includes: Keypad, SmartBracket, 4 AA batteries (pre-installed), installation kit, quick start guide
