Big Productivity in a Small Package

The ASUS GeForce® GT 710 is a passively-cooled graphics card that enables quiet multi-monitor productivity.

Passive Cooling

A passively-cooled design creates a quieter workspace.

Supports 3 Displays

ASUS GeForce GT 710 is a compact graphics card with three outputs (HDMI, DVI and D-Sub) that can support up to three displays at the same time for convenient multitasking.

Auto-Extreme Technology

Auto-Extreme Technology is an automated manufacturing process that sets new standards in the industry by allowing all soldering to be completed in a single pass. This reduces thermal strain on components and avoids the use of harsh cleaning chemicals, resulting in less environmental impact, lower manufacturing power consumption, and a more reliable product overall.

GPU TWEAK III

ASUS GPU Tweak III is more intuitive and feature-rich than ever before. A revamped interface offers greater accessibility by integrating core functions into a centralized dashboard, and our Voltage-Frequency tuner has been overhauled to make overclocking even easier. Additional goodies like 0dB fan technology, automatic profile swapping, a fully customizable on-screen display, and logging capabilities ensure that you get the most out of your graphics card.
