

AVHUB

Yealink AVHUB Meeting Audio & Video Processor

Product Overview

Yealink AVHUB Meeting audio & Video Processor, including 7.5m Cat5E cable, 2.5m USB cable, Power Adapter, 2x USB Type-A Port, 1x USB-B Port, 1x Codec Port, 7x VCH Port (RJ-45), 1x RCA In/Out Port, 1x 6.3mm line in Port, 1x 6.3mm line out Port, Designed for Large Conference Rooms, Supports multiple cameras / microphones / Speakers

Specifications

Overview:

Yealink AVHub - Meeting Audio & Video Processor

AVHub is an audio-video processor designed for large conference rooms and the conference industry. It supports multiple cameras, microphones, and speakers, enhancing PC performance. Devices connect to AVHub via Ethernet cables with Power over Ethernet (PoE), simplifying wiring and allowing centralized management. Users can adjust camera layouts with the Yealink plugin before or during Microsoft Teams Rooms (MTR) meetings.

- Multi-camera Layout
- Support Multi-camera IntelliFocus
- Support Divisible Room
- Easy Deployment
- BYOD
- Audio & Video Processing Capability

Features:

Multi-Camera Solution, Customized Layout in Any Meeting

With the AVHub in the room system bundle, the system allows users to enable multiple cameras simultaneously from a single room, better capturing participants and providing different views of the rooms. Moreover, the users can choose different tracking modes for each camera. In the meantime, remote attendees can view the video feeds of all enabled room cameras in a customized layout, contributing to more industrial scenario applications.

AI-Enabled Chipset, Infinite Possibilities for Future Applications

Equipped with a powerful AI-enabled chipset, AVHub empowers the bundle system with great scalability in future applications including together mode in Microsoft Teams. The AVHub enables direct audio and video processing, reducing the operational burden of Mcore.
