

BHR4037GL

Xiaomi Smart Space Heater S - EU

Product Overview

Xiaomi Smart Space Heater S - EU

Specifications

Features:

A warm home for you Xiaomi Home app remote control

Control the room temperature anytime and anywhere. Use the app to turn the heater on remotely.

Find comfort in any moment Smart temperature control for comfortable environment and power saving

When the surrounding temperature is lower than the preset temperature, it will automatically continue heating; when the surrounding temperature reaches the preset temperature, it will automatically reduce the power or stop heating. With a built-in adjustable thermostat, the heater will keep your home at a comfortable temperature and is more energy-saving than many non-thermostat electric heaters.

Two-way heat emission, natural convection Let the warmth spread in the room

The heated air rises and the cool air comes down producing a convective effect for air circulation and room heating. The wide front and top air ducts allow for heating close areas and the entire room.

Comfortable and quiet

It circulates to form convective hot air, which flows in both directions from the top and sides. The air flow is softer than that of an AC and is not as prone to dryness. It will not interfere with your sleep at night, and will not cause dry eyes and throat in the morning.

Wide air duct design for faster heating

With an optimized air duct, the temperature rises faster and the warmth quickly spreads throughout the entire home.

Small and flexible body Integrated drying rack design

With simple and practical body design, the heater is small, flexible and easy-to-move. The integrated drying rack can load 1.5kg dry clothes while heating.

Warm Tips

When using the electric heater, it is recommended to first set the thermostat to maximum temperature, close the doors and

windows to warm up the room. Keep the heat from dissipating for 20-30 minutes, and then adjust the temperature according to your preference. The heating effect will be better after the room has been preheated.

Notes on the usable area

Factors such as house height and insulation will affect the heating effect. Self-built buildings with limited insulation, new buildings with high levels of moisture can also affect the heating performance. If your home is situated on the top floor, with limited sunshine exposure, has large glass windows or is located in a cold area, that can also affect the heating process.

Specifications

Product Code	BHR4037GL
Type	Convection heater
Rated Power	2200W
Rated Voltage	230V, 50Hz
Temperature	18/20/22/24/26/28
Timer on Device	1/3/5/9-hour
Timer adjustable by app	0-12 hours
Connectivity	2.4GHz Wi-Fi
Size	780x216x526mm
Net Weight	5.7kg
