Specifications

About this product

The Okion Digitcopier CAY1U2 is a portable USB 2.0 OTG device that lets you copy and back up data between two USB storage devices without a computer. Compact and battery powered, it is perfect for photographers, students, and professionals who need reliable data transfers on the go.

Overview Summary

The Okion Digitcopier CAY1U2 is a portable USB 2.0 data copier designed for quick transfers between two USB storage devices without the need for a computer. With its OTG (On-The-Go) bridge technology, this compact device provides a fast and convenient way to back up, duplicate, or free up space on your USB drives, digital cameras, and MP3 players.

Featuring a simple one-touch copy function, the Digitcopier allows users to move photos, music, documents, and other files directly between devices at speeds of up to 480 Mbps. Its lightweight design makes it the ideal travel companion for photographers, students, and professionals who need a computer-free solution for data management.

Performance tier: Portable utility device

Uses: Data backup, File transfer, USB device duplication, Camera photo storage, On-the-go media copying

Overview

Free up your valuable memory by transferring the stored data to your mass storage device. OTG (On-The-Go) bridge allows you to copy data digitally between two USB enabled portable device, such as MP3 player, digital camera, flash memory drive, etc; via the high USB2.0 speed, all WITHOUT computer system. Simply enough, here is an instant and handy solution for you to copy whatever stored in a USB enabled storage device (source) to another USB storage device (target). One of the many perfect applications would be to copy all the photos inside your camera temporary to a larger capacity USB flash drive, so that you can immediately free up the memory card and continue shooting photos.

ComX Computers

Product Specification Sheet

With OTG bridge you can now transfer data between two USB storage devices even when a PC is not available. For instant, if you have a flash-drive you can now use the OTG bridge to top the files from the digital camera, PDA, or any other device with a USB output port and cable to the flash drive on the go.

Features

- Digital data copying between two USB storage devices totally without computer
- OTG (On-The-Go) bridge allows useful applications such as copying/backing up data from USB pen-drive, cardreader, USB harddisk, digital camera to another USB mass storage device
- No more running out of memory, get the data transferred to the target mass storage device
- Data transfer rate at USB2.0 speed, upto 480Mbits/second
