Specifications

Features:

No Compromise
Let's say you have that beautiful Asus Transformer Pad 300. It has everything, the latest Android version available, the fast processor and a beautiful screen. Such beauty shouldn't come unnoticed and such beauty needs to be protected. Transformer Folio - Carbon Texture protects your precious Asus Pad in style. The slim carbon texture design protects the front and the back of your Transformer Tablet without compromising the design and looks of your tablet. Even the color of the Folio matches the tablet and the rubber coated frame prevents your tablet from scratches.

Work, Play or Study
Whenever you work, play or study - thanks to the Transformer Folio you can use your tablet in different viewing angles, high enough to relax and watch a movie or a lower angle to finish that e-mail to your boss. You just uncover the Transformer Folio and fold it backwards to use your tablet in the most comfortable way.

Magic Magnet
When we designed the Transformer Folio we wanted to keep the great look of the Transformer Pad 300 intact. Therefore we created a magnetic system inside the Transformer Folio so when you're finished working or playing you can simply close the Transformer Folio and move on. Because of the thin design you can still see you have an astonishing Asus tablet. The magnetic system prevents the folio from opening and you don't need an extra strap or band to secure it. So when closing the folio, it's really closed. Transformer Folio is compatible with Asus Transformer Pad TF300 T / TG.
