Specifications

Overview:

You've got some amazing hardware, so why not show it off? Introducing Colossus Window, a brand new option for users who want to let the world see the hardware they're running. Users can choose between three color options, including Black/Red, Black/Green, or White/Blue to perfectly match their computing environment. Featuring a newly-designed windowed side panel, and two color-matched 230mm LED fans and the same modern and elegant styling, Colossus Window is a fresh twist to the ultimate enthusiast PC chassis.

Features:

BitFenix SofTouch™ Surface Treatment

Colossus comes coated with signature BitFenix SofTouch™. This proprietary surface treatment not only looks fantastic, but also lends a one-of-a-kind soft feel to the chassis itself. BitFenix SofTouch™ also helps resist fingerprints and stains, preserving the sleek look of your BitFenix chassis. Feel the BitFenix difference with SofTouch™.

Newly-Designed Windowed Side Panel

Angled to perfectly match the silhouette of Colossus Window, the windowed side panel lets you bring your installed hardware into the spotlight for the world to see. What's more, up to two additional 120mm fans can be installed on the side panel for added cooling.

Three Slick Color Options

Available in Black/Red, White/Blue, and Black/Green, you can choose the color combination you want to perfectly match your hardware.

Two 230mm LED Fans

To keep everything frosty cool, two 230mm LED Fans come pre-installed. Also, the LED colors are color-matched to perfectly complement your Colossus Window and highlight the hardware within.

LED Light Controls

Need to go to sleep? Colossus Window comes equipped with light controls so you can turn off the front panel lights quickly and easily. Best of all, the controls also work with BitFenix Spectre™ LED fans, so you can turn off all the lights in your system with a single button press.

Unmatched Security with BitFenix S3™

Colossus Window comes with BitFenix S3™ - a storage compartment and security system in one. Place your iPhone, hard disk, or other valuables in S3 and lock them away for safe keeping. S3 will even lock down peripherals like USB mice and

keyboards plugged into it, and secure everything under lock and key. Simple, safe and secure - that's BitFenix S3.

Complete Cable Management

Messy cables not only look bad, but they can also restrict airflow in a chassis. That's why Colossus Window is designed to manage cables both inside and out. Keep cables from cluttering the inside of the chassis with Colossus Window's strategically-placed cable holes. Prevent cables from getting caught in opening optical drives with the unique cable-holding front bezel.

Epic Expandability

Colossus Window gives you the space to build your own supercomputer. Capable of accommodating eight PCI express devices and seven 2.5" SSDs or seven 3.5" hard disk drives, Colossus Window is ready for multiple upgrades - perfect for a rig of epic proportions.

Massive Cooling

When the action heats up, your system needs to keep its cool. Colossus Window can be outfitted with up to two 230mm fans, three 140mm fans, or five 120mm fans, meaning huge cooling potential for all system components.

Easy Installation

Big doesn't have to mean unwieldy. Featuring a motherboard CPU cooler cutout on the motherboard tray, specially-designed motherboard standoffs, and an almost completely tool-free design, getting your system up and running with Colossus Window is a joy.

Specifications:
