Specifications

Features:

Impressively Detailed Craftsmanship

909 is constructed with solid materials, and its chamfered edge design and sleek anodized aluminium are beautifully crafted to masterfully create a streamlined and smooth enclosure inside/out.

Simplicity in Design

909 features a single piece 4mm brushed aluminium shell and an elegant back panel that hides unnecessary rear I/O cables. The clutter-free design demonstrates the elegant aesthetics of simplicity.

Tempered Glass Side Panels

The side panels are finished entirely out of 5mm tinted tempered glass which reveals the internal LED light, and overall enhances the 909 into a truly modern and dynamic appearance.

USB 3.1 TYPE-C

909 is equipped with one all-new reversible USB3.1 TYPE-C port for ultimate speed transfers up to 10Gb/s which is twice as fast USB3.0.

Magnetic Aluminium Dust Filter

The front intake fan dust filter has an embedded magnet design for easy removal creating a convenient installation and more importantly excellent dust reduction.

Elegant Lighting Effects

A high-quality chassis should look beautiful when powered on and with the 909 it has a white LED strip creating various lighting effects to illuminate the PC interior beautifully highlighting the interior components

Unique HDD & PSU Chamber Design

The separate HDD and PSU chambers provide an ideal thermal environment by allowing heat airflow to dissipate directly to the back venting holes without interfering with the motherboard and graphic card area, and significantly improving the ventilation.
