Hydraulic Bearing with Low-Noise Design

The hydraulic bearing self-lubricates with a high-quality, friction-reducing substance, which lowers operation noise while improving thermal efficiency. The seal cap prevents lubricant leakage and extends the lifespan of the unit.

PWM Controlled Fan with 9-Fan Blade Design

Riing Quads PWM controlled fan is designed with 9 blades and is engineered to generate higher airflow without compromising on ultra-silent operation.

Note:

*It is recommended to connect up to 1 controller and 5 Riing Quad fans on one peripheral cable(Molex)only.

*DO NOT connect Riing Quad fans to other TT RGB PLUS controllers.

Extraordinary Cooling Performance

A specially designed fan blade allows even stronger flow, the Riing Quad fans ensure the cooling performance more efficient under intense operation.

Riing Quad 14 - 60.17 cfm/ 500-1400rpm /1.71 mm-H2O

Riing Quad 12 - 40.9 cfm / 500-1500rpm / 1.4 mm-H2O

Anti-Vibration Mounting System

The In-mold injection anti-vibration rubber pads allow the fan to spin at higher levels without compromising noise levels. The fan is designed with 80% coverage for all corners, maintaining low noise levels when in operation.
