Specifications

Overview:

Power bank PB-301
That' s a real powerhouse among power banks! The PB-301 stores a whopping 30000 mAh of electric juice for your devices. It has dual input ports: Type-C and MicroUSB, the latter one for the times when you need to keep it old-school. The USB-C port is both input and output, and it' s Power Delivery - meaning you can charge your power bank faster, too. Two USB-A ports support Quick Charge 3.0, making three output ports charge all your gadgets three times quicker. The built-in status display will tell you if fast charge mode is active and help you monitor the percentage of power left. We used the Smart IC technology in this power bank. This thing can detect your device and cable capacity and optimize voltage. It also protects your gadget from short-circuiting, overheating, and other threats. If you like to spend a lot of time off the grid, that' s your power bank of choice!

- 30000 mAh of capacity
- USB-C PD & MicroUSB input ports
- Output: Type-C PD and two USB-A QC 3.0
- Status display
- 6 types of protection
- Charges 3 times faster
