Specifications

Features:

120W power Cooling
Tiny 120W class cooler applied the DTH, S bending technology and the optimal heat dissipation design. Emit the air straight from the fan to the mother board through down blowing design, it cools down not only the CPU but also the components around it.

DTH technology applied
Direct Touch Heatpipe (DTH) Base technology transfers the CPU`s, heat directly to heatpipes, thereby minimizing heat resistance and maximizing cooling performance.

'S'Bending technology applied
Connect all the fins on one heatpipe using `S` bending technology to maximize the cooling effect.

Optimized fin structure
Fin design that is optimized for heat dissipation via a small, lightweight for most efficient cooling performance.

80mm PWM fan
Equipped with a low-noise 80mm PWM fan, user can control the RPM to achieve high performance / low noise depending on the CPU temperature.

Light compact size
High-performance, ultra-compact, light weighted. It can be mounted in all cases including mini-ITX case.

ZM-STG2M provided
The high performance super thermal grease ZM-STG2M maximizes heat transfer from the CPU to the base of CNPS2X for intensified cooling performance.

Wide compatibility
CNPS2X accommodates a broad range of sockets.

- Intel LGA1156/ 1155/ 775
- AMD FM1/ AM3+/ AM3/ AM2+/ AM2
