Specifications

Overview:

In one tiny package, the PQI Connect Series offers the ultimate in power and convenience. The secret is in Connect's dual head. Equipped with both a micro and standard USB head; PQI Connect allows you to seamlessly transfer multimedia files between your smartphone, tablet PC, and traditional PC. With PQI Connect's standard USB head-compatible with USB ports found on traditional PCs-taking files, videos, music, and pictures on the go is no problem. PQI Connect's micro USB head means that downloads to and from your smartphone or tablet PC-whether it be your favorite video of the week, or that picture from your recent trip to Bali- has never been faster or easier. For power, speed, and convenience in the palm of your hand, look no further than the PQI Connect.

Features:

A Brand New Storage Solution

PQi Connect 203 is a storage device for smartphones, tablets, and PCs that comes with micro SD, micro USB, and standard USB interfaces. It is the perfect solution for the limited storage capacity that plagues mobile devices. You can expand your storage by simply changing micro SD cards. And say goodbye to cumbersome USB cables-with PQI Connect 203 you can just plug and go.

Affordable Convenience

Smartphones today offer consumers a large range of storage capacities. Higher storage capacity, however, means higher cost. Yet with PQI Connect 203, not only can you expand the storage space on your smartphone for a fraction of the cost of buying a high storage capacity smartphone, but if you later decide to switch phones, PQI Connect 203 can be used again and again. Plus, you can simply expand your storage space by using a micro SD card with a larger storage capacity, saving you a bundle in storage upgrades.

Fast & Reliable

The USB 2.0 operates at 480 Mbps, far greater speeds than 54 Mbps Wi-Fi and 25 Mbps Bluetooth. PQI Connect transfers your information with blazing speed, less drain on your battery, and leakage prevention. Once your files are uploaded, PQI

Connect also makes it a snap to preview and browse uploaded files or playback multimedia content.

Making Sharing Even Easier

PQI Connect+ is a free app developed by PQI for the Android OS that allows users to use their mobile devices to directly access files on PQI Connect 203 without any complicated set up or unnecessary steps. With just a touch, users can quickly manage or transfer multimedia files between their PQI Connect 203 and mobile device, or even Facebook.

Light as a Feather, Thin as a Dime

PQI's patented technology allows us to dramatically reduce the size of our flash drives. PQI Connect 203 is no exception. Its small size and refined design means you will never find it to be cumbersome or out of place when using it with your smartphone or tablet PC. PQI Connect 203: where design and function come together as one.
