

DT-WB

Microworld XProd CCTV camera mounting Pole with base stand

Product Overview

Microworld XProd CCTV camera mounting Pole with base stand, Dedicated camera mounting, Built with a sturdy Metal Pole (Aluminum), Heavy-Duty Plastic base plate

Specifications

Overview Summary:

Securely install CCTV and IP cameras with the XPROD DT-WB mounting pole with base stand. Built for stability and reliable performance, this heavy-duty camera mounting solution is ideal for areas where wall or overhead installation is not possible. Its elevated design ensures a clear and wide surveillance view, making it suitable for both residential and commercial security setups.

Designed for versatility and durability, this CCTV mounting pole supports indoor and outdoor installations across retail spaces, parking areas, and property perimeters. The robust construction provides long-term reliability while maintaining a clean and professional camera installation point. Buy now to upgrade your surveillance coverage with a stable and practical mounting solution tailored for security needs in South Africa.

Performance tier: Professional-Grade Security Hardware

Uses: CCTV installation, security surveillance systems, outdoor monitoring, retail security coverage, parking area surveillance

Overview:

CCTV Wall Brackets DT-WB - XPROD CCTV Camera Mounting Pole With Base Stand

CCTV WALL BRACKETS - DT-WB (XPROD CCTV Camera Mounting Pole With Base Stand) is a purpose-built surveillance mounting solution designed for locations where wall or overhead installation is not possible. It provides a stable and elevated platform for security cameras, ensuring a clear and unobstructed viewing angle for improved monitoring performance in both indoor and outdoor environments.

Description:

The XPROD CCTV Camera Mounting Pole delivers a secure and practical mounting option for CCTV and IP cameras, especially in open areas or structures lacking suitable mounting surfaces. Built with a strong aluminum metal pole and a heavy-duty plastic base plate, it combines durability with installation flexibility. The top-mounted camera housing ensures secure positioning while maintaining a clean and professional installation finish. This solution is ideal for improving surveillance coverage in commercial, residential, and industrial environments where stability and visibility are essential.

Features:

Camera Mounting Design for CCTV and IP Cameras

This system includes a dedicated top-mounted camera enclosure designed to support a wide range of CCTV and IP security cameras. It keeps the camera firmly positioned while allowing optimal alignment for monitoring key areas such as entrances, walkways, and open spaces. The integrated mounting point also helps protect the camera connection area and maintains a neat installation appearance.

Durable Metal Pole Construction

The structure is built using a reinforced aluminum pole designed for strength and long-term performance. Combined with a robust plastic base plate, it provides reliable resistance for continuous use in varying environmental conditions. The design supports both indoor and outdoor installations, ensuring consistent stability over time.

Stable Ground Base and Installation

The wide square base plate is engineered for secure floor or ground mounting. Pre-drilled anchor points allow firm installation into concrete, decking, or other solid surfaces. This ensures the structure remains stable even in high-traffic or exposed environments, reducing vibration and improving camera accuracy.

Key stability points include:

- Wide base plate for improved load distribution
- Anchor-ready mounting holes for secure fixing
- Suitable for concrete and hard surface installation
- Strong resistance to movement after installation

Ideal Installation Height and Viewing Coverage

The elevated pole design improves surveillance coverage by positioning cameras at an optimal height. This helps reduce blind spots and improves visibility across larger areas such as parking lots, retail floors, and building perimeters. The raised perspective also enhances overall monitoring accuracy.

Applications and Use Cases

This mounting solution is suitable for a wide range of security environments where traditional wall mounting is not practical. It is commonly used in commercial, residential, and public spaces requiring reliable camera positioning.

Typical applications include:

ComX Computers

Product Specification Sheet

- Retail storefront surveillance
- Parking garages and open parking areas
- Residential perimeter monitoring
- Warehouses and industrial facilities
- Public open spaces and access points

Key Technical Details (SKU DT-WB)

Part Number / SKU: DT-WB

- Material: Aluminum metal pole with heavy-duty plastic base
- Mounting type: Floor or ground-mounted CCTV pole system
- Camera support: Compatible with CCTV and IP cameras
- Base design: Square pre-drilled plate for anchor bolt installation
- Installation environment: Indoor and outdoor use
- Structure type: Dedicated surveillance camera mounting pedestal

The DT-WB mounting pole provides a practical and stable alternative to wall-mounted systems, offering flexibility in installation while maintaining strong structural integrity for professional surveillance setups.
