professional finish. Verbatim's high quality recording layer provides dependable recording performance, while the 25 disc spindle offers convenient storage for business and personal use.

Performance tier: Professional archival optical media

Uses: Data backup, video recording, software distribution, photo archiving, business presentations, custom printed discs

Description

The Verbatim 43667 DVD+R Double Layer media provides dependable high capacity optical storage for users who need more space than standard single layer DVDs. Each disc stores up to 8.5GB of data or approximately 215 minutes of video, allowing large files to be recorded onto a single disc.

The wide inkjet printable surface enables full surface printing using compatible inkjet disc printers, making these discs suitable for professional media production, business presentations, training material, event recordings, and personalised media. The printable area extends from 21mm to 118mm for maximum label coverage.

Verbatim optical media is developed for reliable recording performance and long term storage of important files, photographs, videos, software, and archived documents. The convenient 25 disc spindle helps keep media organised and protected until use.

- 25 disc spindle packaging
- Compatible with DVD+R DL capable writers

Guaranteed Quality

When drive manufacturers test their products, they use Verbatim media. It's the global No.1 for a reason - guaranteed quality! Due to the extensive research and development undertaken over the past 50 years, Verbatim is able to provide the highest quality discs which ensure that all your data will be safely stored and will last a lifetime.

Double the layers, double the capacity

The double / dual layer of recording has been made possible by the creation of a new substrate layer that sits in between each recording layer. This allows the laser beam to record on both layers. Once the first layer has been recorded, the laser re-focused to record on the second layer. 8.5GB capacity in a single disc!

Customise your disc

Verbatim printable discs feature a printable surface designed for use with your inkjet printer. These discs allow you to print whatever you wish across the entire surface of the disc.

Long Lifetime

Optical discs provide the best solution for long-term safe and secure storage of your important files - ideal for all your precious photos, videos and documents that you want to keep forever. They are dust and water resistant and can withstand wide changes in temperature and humidity.
