Specifications

About this product

The Everki Business 120 18.4" Travel-Friendly Laptop Backpack is designed for professionals and travellers who demand premium protection, smart organisation and generous capacity - it accommodates laptops up to 18.4", features a 40 litre capacity, an airport-friendly 180degrees lay-flat opening and an ergonomic 5-point strap system for comfortable weight distribution.

Overview Summary

Product title:Everki EKP120 Business 120 18.4" Travel-Friendly Laptop Backpack

This backpack blends rugged durability with professional style, offering robust protection for large laptops while keeping your accessories organised and accessible. With internal high-contrast lining and dedicated compartments, the Business 120 makes it easier to find cables, peripherals and documents on the go.

Featuring a cabin-friendly fold-flat 180degrees opening, weather-resistant exterior and unlimited-lifetime warranty, this model is ideal for business travellers, digital nomads or anyone carrying heavy tech gear. The ergonomic design with padded back panel, airflow channels and multiple straps ensures comfort even when fully packed.

Performance tier:Premium travel-pro / business class

Uses:Business travel, commuting, large-laptop transport, tech gear organisation

Overview

Your bag should meet your device's expectations. Today's high-end gaming and multimedia devices will feel well-represented, secure, and comfortable in this sharp, smartly-designed and spacious backpack.

Description

The Everki Business 120 laptop backpack is crafted to deliver premium protection for large laptops up to 18.4" and accommodate a full suite of essentials for mobile professionals. Its external shell is built from durable water-resistant materials and features large metal zippers with lock holes for added security. Internally, the high-contrast orange lining simplifies locating items quickly, while multiple dedicated compartments provide space for a laptop, tablet, power brick, cables, documents and accessories.

Designed with travel in mind, this backpack opens flat (180degrees) for hassle-free security screening and fits in most airline cabins. The ergonomic 5-point balance strap system distributes weight evenly and keeps the load comfortable over long journeys. A padded back panel and airflow channels ensure added comfort during daily commutes or multi-day trips.

Whether you're carrying a large workstation laptop, multiple peripherals or personal gear, this backpack is tailor-made for the modern tech-savvy professional who refuses to compromise on space, comfort or quality.

Features

Highlights of the Business 120 include:

- Extra-large laptop compartment that accommodates up to 18.4" computers with a secure strap for device stability.
- Airport-friendly 180degrees open fold-flat design for easy screening and access.
- Generous 40 litre capacity to hold backpacks, peripherals, cables, documents and more.
- Ergonomic 5-point strap system, padded mesh back-panel and airflow channels for enhanced comfort on long carries.
- Durable, weather-resistant materials and heavy-duty zippers with lock holes for added security.
- High-contrast orange interior lining to improve visibility of your contents.

- Dedicated compartments and pockets for tablets, media devices, power supplies and accessories.

Large enough for life

The EKP120. This is where function meets form. We've designed this backpack to be large enough to hold what you need, yet intuitive enough to find things where you expect them. Countless hours were spent designing, redesigning and testing the EKP120 to ensure the quality, versatility and style you've come to expect from an EVERKI bag. Our passion for function and a relentless attention to detail makes the EKP120 a veritable powerhouse. You require large compartments and high functionality, but you don't want to compromise on form. So the EKP120 is tailored to be spacious, yet stylish and sleek - with black exterior and high-contrast orange interior. We created the EKP120 to be just what you're looking for.

Intuitive design

Yes, The EKP120 has lots of large compartments, but that's not what makes it so innovative. We've designed intuitive spaces for smart organization, buckles and straps positioned for on-the-fly adjustments; and pockets, pouches and slots for fingertip access. The extra large laptop compartment is roomy enough for the most behemoth 18.4-inch laptop. In the main storage area, you'll find large, divided spaces which allow you to keep chargers and power supplies separate from fragile files and documents. The felt-lined tablet pocket safely secures your iPad or Kindle, while the front compartment allows you to store business cards, pens, calculators or peripherals. And the soft, scratch free, lined portable media player pocket with cable outlet is positioned right at shoulder level to give you enough length in your cord for comfortable, slack free use.

Travel friendly

Airport security can be a big hassle, so we designed the EKP120 with our hassle-free 180 degree fold-out design. The Checkpoint Friendly laptop compartment allows you to breeze through airport security without removing your device from its compartment. Simply open the EKP120 up 180 degrees, lay it flat, and your bag will quickly pass through the scanner. Should you need to remove your laptop, you can take it out and replace it without rummaging through your backpack or removing other contents. Take the EKP120 on the plane with you. It's designed to fit in the cabin above and in most cases, under the seat. It's that friendly.

Ergonomically designed

When your backpack is fully loaded it can get heavy, so we engineered a 5-point balance strap system to ergonomically distribute the weight and reduce muscle strain. With pillow-soft straps adjustable at the shoulders, 2 quick-slide straps at the bottom and one across the chest; you have total control over weight distribution. This allows you balanced comfort, even when your backpack is full. The EKP120's ergonomically designed carry system also boasts a padded back panel, mesh padding and deep airflow channels to provide maximum air circulation for breathability. The EKP120: cool comfort, total control.

Security and protection

Your equipment is valuable, so we added multiple layers of padded protection, a security strap to keep your device in place, and super soft felt that ensures your laptop is secure and safe - even when traveling. The interior of the tablet pocket is also felt-lined and properly sized for an iPad, Kindle or other tablet to minimize damage caused by slipping and sliding. The EKP120 also comes with a water-resistant weather cover to protect your gear from the elements. The large metal zippers come with lock holes to keep your contents safe. Don't worry, you're covered.

Accessories pouch

You don't want your power brick to get in the way or become a tangled mess. That's why we designed the Accessories Pouch to separate your mouse, chargers, power supplies and cables from your more sensitive items.

High-contrast lining

All EVERKI interiors are stylish, high-contrast orange because we know how frustrating it is to mistakenly leave a compartment unzipped, and how difficult it is to organize against a black background. Savvy and Stylish.

Large zippers and metal pulls

Have you ever broken a zipper on your favorite bag We have. That's why we designed the EKP120 using heavy duty metal zippers with extra large pulls. So your favorite backpack can remain your favorite backpack.

FAQ

Q: Will this backpack fit a 17.3" or 18" gaming laptop?

A: Yes, the Everki Business 120 is rated for laptops up to 18.4" in size, so it will accommodate both 17.3" and most 18" models with room to spare.

Q: Is this bag suitable for airline cabin travel?

A: Yes, the backpack features a 180degrees lay-flat fold-out design to streamline airport security screening and its dimensions comply with many airline cabin luggage requirements.

Q: How comfortable is it to carry when fully loaded?

A: The design incorporates a 5-point strap balance system, padded back panel and mesh airflow channels to help distribute weight and maximise comfort even when packed with heavy gear.

Q: Does the bag provide protection against rain or spills?

A: While the backpack is not fully waterproof, it includes a water-resistant exterior and an integrated rain cover to guard against inclement conditions.
