Specifications

Features:

RGB LED Lighting Module

There are six independent RGB LEDs stationed in the center of the fan. Gamers can control the LEDs with their motherboard control software. No controller required!

Daisy Chain, Modular Connector Design

Our new modular connector design allows each fan to link with each other to create a daisy chain effect. This new setup allows for easier installation and tidier cable management. Users can create their own personal experience with flexible fan combinations.

Transparent Frame

The RGB LEDs penetrate from the center and expand throughout the transparent frame, increasing the visual lighting experience. Also, the PBT material is heat-resistant, which increases long-term durability.
