Overview:

Product Snapshot

Fanvil A10 2SIP IP54 Audio Intercom is a compact standalone IP intercom designed for secure indoor communication. It supports two SIP lines, delivers HD audio, includes a built in electric relay, and operates without the need for a central server. With a 2W power amplifier and durable IP54 rated housing, it is well suited for offices, residential buildings, and controlled access areas.

Fanvil A10 Series SIP mini intercoms are designed for indoor scenes with security, intercom, and broadcasting functionality. They have a compact and fashionable appearance, featuring 3 detachable function buttons that can be customized according to your needs. They have rich functions such as HD audio, IP54 waterproof and dustproof, and built-in 2.4G & 5G Wi-Fi (A10W/A10W-E), providing a high-quality communication experience for the user. Moreover, they support wall mountable(A10/A10W) and standard 86 box embedded(A10-E/A10W-E) installation for more indoor application scenarios.

Description:

The Fanvil A10 SIP audio intercom offers reliable two way communication with clear sound quality and simple deployment. Its standalone operation removes the need for additional servers, while SIP compatibility allows easy integration into existing VoIP systems. The robust design, flexible button configuration, and support for PoE make it a practical choice for secure entry points and internal communication needs.

Features:

Designed for Secure Indoor Communication

The Fanvil A10 is built for environments where dependable voice communication and access control are essential. Its IP54 rated enclosure helps protect against dust and water, making it suitable for demanding indoor locations such as entrances, corridors, and reception points.

Audio Quality You Can Rely On

Clear communication is ensured through advanced audio processing and a powerful speaker.

- HD voice support using G.722 and Opus codecs
- Integrated 2W speaker for loud and clear output
- Acoustic Echo Cancellor for natural conversations

Flexible Calling and Control Options

This SIP intercom supports multiple call scenarios and simple physical interaction.

- Two SIP accounts for flexible call routing
- Three detachable and programmable function buttons
- Built in electric relay for door or device control

Simple Installation and Power Options

The A10 is designed to fit easily into different indoor layouts with minimal setup time.

- Supports PoE for single cable power and data
- Compatible with wall mounting and embedded box installation
- Standalone operation with no central unit required

Ideal Use Cases

The Fanvil A10 SIP audio intercom is well suited for offices, apartment buildings, schools, and commercial spaces where clear communication, compact design, and straightforward installation are priorities.
