

FAN-IC-CARD

Fanvil IC Access card

Product Overview

Fanvil IC Access card

Specifications

Overview Summary:

The Fanvil IC Access Card is a reliable solution for secure and efficient entry management across residential, commercial, and office environments. Designed for compatibility with Fanvil access control systems, this card allows quick authentication while maintaining strong security standards. Its durable construction ensures long-term use, making it ideal for daily access needs.

Perfect for businesses and property managers looking to streamline access control, this IC card offers convenience and peace of mind. Whether managing employee entry or restricting access to secure areas, this card delivers consistent performance. Buy now or shop now to enhance your security system with a trusted access solution.

Performance tier:Standard

Uses:building access control, employee identification, office entry systems, residential security access, restricted area entry

Overview:

Fanvil IC Access Card for Secure Entry and Identification

Designed to integrate seamlessly with compatible Fanvil devices, the Fanvil IC Access Card offers a simple and reliable solution for secure access control and user identification. It is well suited for office environments, residential complexes, and hospitality settings where quick, contactless authentication is required. With consistent performance and easy deployment, this card enhances operational efficiency while maintaining a high level of security.

Description:

The Fanvil IC Access Card is a compact and dependable contactless card used for access control and identification within compatible systems. It enables fast tap-and-go authentication, reducing the need for manual entry or physical keys. Built for durability and consistent signal performance, it is ideal for workplaces, hotels, and managed facilities that require streamlined user access. Its compatibility with Fanvil systems ensures smooth integration, making it a practical addition to existing setups.

Features:**Efficient Contactless Access Solution**

This IC access card simplifies how users interact with secure systems. Instead of relying on passwords or keys, users can gain access with a quick tap, improving both speed and convenience. It is particularly useful in high-traffic environments where efficiency and reliability are essential.

The card's compact form factor makes it easy to carry in wallets or badge holders, ensuring it is always accessible when needed. Its durable construction supports long-term use, even in demanding daily conditions.

Ideal Use Cases

The Fanvil IC Access Card can be deployed across a variety of environments where controlled access is required:

- Office buildings and corporate environments for employee access
- Hotels and guest facilities for room or service entry
- Residential estates and apartments for controlled entry points
- Educational institutions for staff and student identification

Key Details and Technical Points

- Product type: IC access card
- Designed for compatibility with Fanvil access control and communication devices
- Contactless operation for quick and secure authentication
- Lightweight and portable design for everyday use
- Durable build suited for repeated use in busy environments

Seamless Integration with Fanvil Systems

One of the primary advantages of this card is its compatibility with Fanvil ecosystems. It integrates smoothly with supported devices, enabling administrators to manage access permissions efficiently. This reduces setup complexity and ensures consistent performance across deployments.

Product Identification

- Part Number / SKU: FAN-IC-CARD

This identifier can be used when ordering or managing inventory to ensure accurate product selection and system compatibility.
