Adata iMemory flash drive Ai920-128G-CBK 128Gb Black - USB3.1 Apple certified MFi lightning dual-connectors Flash Drive for iOS/MAC/PC, COB design with mini-size (37.8x16.9x6.9mm), dust and water resistant, support Ultra HD 4K video playback Apple AirPlay; 61x32x10mm, USB3.1 read/write: 150/50 mb/sec, Lightning read/write: 30/20 mb/sec, with iOS/MAC/PC backup software

Specifications

Overview:

The AI920 Flash drive is a super-slim and ultra-light multi-purpose storage device, primarily for iOS devices. It features Lightning and USB 3.1, delivering high speed performance for all content types, with support for Live Photos, diverse multimedia, and subtitles - a great plus for movie and TV fans. The AI920 offers instant storage and simple sharing, made strong with water and dust proofing and extra-convenient thanks to extended-clearance connectors and even one-touch backup. For style, versatility, and reliability, the AI920 is a sure plug in.

Features:

Compact and Slim
At just 6.9mm thin and 3.6g light, the AI920 is slimmer than pretty much any smartphone on the market right now. When connected, it doesn't look like a bulky attachment nor does it add bothersome weight. Instead, it's a sleek extension of devices that never gets in the way of enjoyment or productivity and always adds much-needed storage.

New in tough Jet Black
The AI920 brings classic usability, so fittingly it's available in a classic deep black look. We've added the Jet Black version to showcase the ever-relevant need for great connectivity, achieving a striking glossy look through advanced finishing that also resists routine scuffing, scratching, and that occur in daily life. A delight for the senses, the Jet Black color scheme is highlighted with gold for a premium feel.

High speed USB 3.1
Five times faster than USB 2.0, the AI920 handles content with great efficiency and saves you the need to wait while data moves. It is also able to work with individual files larger than 4GB each - perfect for Full HD and Ultra HD media

Recording and directly saving

The AI920 supports all the file formats and standards that power contemporary smartphone photography. This includes support for Live Photos on iOS, burst mode, and action shots. The AI920 allows you to save precious moments, but doesn't get in the way

Image filters and effects
Complementing ever-improving iPhone camera capabilities, the i-Memory app has added its own dedicated camera section, with a variety of filters, mood effects, and other tweaks that can be applied to photos. For yourself or sharing on social media, modify images for a special touch, choosing elements such as black and white, retro, vivid, and many others.

Dust and water resistant
Sturdy chip on board (COB) construction and demanding ADATA tests ensure the AI920 is highly dust and water proof. From sandy beaches to refreshing waterfalls, your memories and content are in good hands with a well-protected and insulated design that keep water and particles out.

Always-fit extended connectors
We thoughtfully designed the AI920 to connect seamlessly even if you choose to have a thick cover on your smartphone. The extended connector provides enough clearance to easily plug into ports whether devices are uncovered or protected by a thick cover or sleeve. No more disappointment or compromise.

Strong encryption
With independent, the AI920 protects all stored content against unauthorized access. It works smoothly in conjunction with phone, app, and file encryption systems, adding to overall safety without creating redundancy or conflicts

One-touch backup
Working with the ADATA i-Memory app, the AI920 enables backing up content from your smart device with one touch. Simply highlight and click, and the app does the rest to save you time and hassle.

Media playback subtitle support
The AI920 adds to its list of media-friendly features with support for major subtitle formats. Watch movies and TV shows without losing out on accurate subtitling and get the full experience in more languages. Precise, fully synced, and clear subtitles are essential for true media fans, and the AI920 delivers.

Live Photo backup
Simply connect the AI920 to your iOS device and directly back up Live Photos for completely intuitive and easy usage. The AI920 caters to more than just still shots - with Live Photos, it's perfect for sharing moment in living detail.

Lossless, high fidelity audio enjoyment
Due to file compression and decompression, in most cases we don't get the full experience when listening to music on electronic devices. Formats such as MP3 tend to be "lossy" on the majority of devices due to basic data algorithms, or codecs. With the AI920 we've integrated advanced lossless codec processing to encompass the entire sonic spectrum. Whether an opera fan or big bass lover, you'll get hear songs the way they were recorded with full impact.

iOS device to TV via Chromecast
In addition to Airplay mirroring on Apple TV, the i-Memory app supports iOS mobile device content display on TV using Chromecast. With a few taps, enjoy content from iPhone or iPad on big screen TVs through easy casting that delivers movies and videos in full, uncompromising audio visual detail.
