Logitech Flight X56 HoTAS (Hands On Throttle And Stick)

Product Overview

Logitech / Saitek 945-000002 Flight X56 HoTAS (Hands On Throttle And Stick) - VR HMD (Head-Mounted Display) ready with RGB Illuminated critical buttons on the stick and twin throttle, 6DoF (6 Degrees Of Freedom - pitch, roll, yaw, backwards, forwards, up, down, left and right), enhanced LCD display with adjustable backlighting, stick with spring centering mechanism 3D twist rudder control grip adjustment, adjustable throttle, Illuminated critical buttons on the stick and throttle - USB

Specifications

Overview:

Designed to enhance the experience of VR gaming and the re-emerging space simulation genre, Logitech G offers the advanced X56 H.O.T.A.S. It's a shining example of complete control featuring analog thumb sticks, RGB lighting 16-bit aileron and elevator axis, 189 programmable controls, and more. X56 delivers an amazing experience for all types of enthusiasts, from fun, plug-and-play gaming all the way to professional, fine-tuned simulation. Get into the latest space flight sims with the best of the best, built to the same exacting standards of all industry-leading Logitech G flight simulation controllers.

Features:

Realism in 360 Degrees of Space
In modern space sims with more dynamic spacecraft physics, control is more complex. And, much different than in traditional atmosphere-based flight simulations. 6DoF is the six degrees of freedom-pitch, roll, yaw, backwards, forwards, up, down, left and right-that all need to be accounted for. X56 features unique, purpose-built mini analog sticks at the thumbs providing four more axes of control plus double as buttons.

Customizable Backlighting to Suit Your Setup
Whether you're in the heat of a dog fight or about to drop the landing gear in the space station, X56 supplies the heroic environment you need for the best experience. Edit the full-spectrum RGB lighting to your liking with feature-rich software found at the link below.

Full Control Placed at Your Fingertips
Not only is an advanced HOTAS like X56 mirroring what you see on screen in the latest games, also the controls are confidently in your hands. For those reasons, plus the immense number and sensitivity of controls makes X56 ideal for head-mounted displays (HMD) and VR gaming. Put on a headset and grab onto X56 for endless adventure.

Advanced Sensors Plus Adjustable Spring System
The combination of contact-free Hall effect sensors within the 16-bit aileron and elevator axis, and the adjustable spring tensioning system gives X56 an unprecedented level of sensitivity and control at the stick. Four springs of differing tensions are included for an extra layer of customization. Even opt for no spring at all.

With Friction Adjuster and Throttle Lock
The innovative twin throttles are ideal for dual-engine spacecraft and aircraft, and even more ideal for battle situations when your primary engine is disabled and you're down to just one. Adjust the friction required to move each throttle and if your craft of choice is single-engine, the throttle lock effectively converts the twin throttles into a single unit.

H.O.T.A.S. Configuration Software Included
Customize all 13 axes, 5 HATS and 31 programmable buttons over three modes. Adjust deadbands and response curves to fine-tune axes. Assign any button to any number of in-sim commands, such as afterburner, Frame Shift Drive, target lock and weapon group firing. The software also lets you assign mouse and keyboard commands to X56, from single-key inputs to timed and macro commands.

System Requirements:

- Smart Technology
- Windows® 10, Windows 8.1, Windows 7
- 2-USB 2.0 Port
- Internet connection for optional software download

Specifications	
Product Code	GA-LFX56
Stick	
Length	18.5 cm
Width	22.5 cm
Height	26.6 cm
Weight	1123 g
Cable Length (Power/Charging)	2 m
Throttle	
Length	18.5 cm
Width	22.5 cm
Height	17 cm
Weight	1156 g
Cable Length (Power/Charging)	2 m
Controller Specifications	
Connection Type	USB
USB Protocol	USB 2.0

USB Speed	Full Speed
Indicator LIghts (LED)	Yes
LCD Display	No
USB Ports (Built-in)	No
Backlighting	Yes
