GIZZU Black 30W 38Wh 10400mAh Mini DC UPS

Product Overview

GIZZU 30W 38Wh 10400mAh Mini DC UPS - Black. 30W DC UPS; 38Wh; 10400mAh; 100-240V AC input; 5V USB; selectable 9V or 12V; 4 x 12V outputs; 450g. Backup power for DC devices such as routers and DC-powered CCTV cameras.

Specifications

Overview Summary

GIZZU 30W 38Wh 10400mAh Mini DC UPS

The GIZZU 30W Mini DC UPS is a compact backup power solution designed to keep essential low-power devices running during load shedding and unexpected power failures. With a 38Wh lithium-ion battery pack rated at 10400mAh, it provides reliable backup power for routers, ONUs, CCTV cameras and other compatible DC-powered equipment.

Featuring multiple DC output voltages and a USB charging port, the UPS offers flexible connectivity for networking equipment and mobile devices. Intelligent protection circuits safeguard connected devices against over-charge, over-discharge and short circuits, making it an ideal solution for homes and small offices throughout South Africa.

Performance tier:Home and Small Office Backup

Uses:Router backup, ONU backup, CCTV backup, fibre internet backup, mobile device charging, load shedding protection

Overview:

The Gizzu 30W Mini DC 38Wh UPS is simple to install and allows you to power various devices during a power outage. With multiple-voltage DC outputs, this UPS can charge mobile devices such as cell phones and tablets via USB. It also features 10400mAh of high-capacity lithium-ion batteries with safety protocols such as over-charge, over-discharge, and short circuit protection.

Warning: Please ensure that the combined power draw of connected devices does not exceed 30W. Ensure the voltage of the device is connected to the correct voltage output before turning the UPS on. Failure to adhere to this warning may result in damage to the connected devices. Refer to your manual for additional safety information.

Description

The GIZZU 30W Mini DC UPS is designed to provide uninterrupted power for critical networking and security equipment during power outages. Its high-capacity 38Wh lithium-ion battery automatically supplies backup power when mains electricity fails, helping maintain internet connectivity and security systems.

Multiple DC outputs allow simultaneous connection of compatible devices such as fibre ONUs, Wi-Fi routers and CCTV cameras, while the integrated USB port provides convenient charging for smartphones and other USB-powered devices. The selectable 9V or 12V output further increases compatibility with a wide range of electronics.

Advanced protection circuitry guards against over-charging, over-discharging and short circuits, ensuring reliable long-term performance and enhanced device safety. Its compact size makes installation simple in homes, offices and small business environments.

Important Safety Information

Ensure that the combined power consumption of all connected devices does not exceed 30W. Always connect equipment to the correct voltage output before switching on the UPS. Failure to use the correct output voltage may damage connected equipment.

Features:

- Power your Router and ONU (Optical Network Unit) during power outages
- Keep your mobile devices charged with the USB port
- 38WEh High-capacity lithium-ion batteries
- Power your CCTV cameras
- Compatible with a wide range of devices
- Intelligent protective design with over-charge, over-discharge, and short-circuit protection

What is in the Box

- GIZZU 30W Mini DC UPS
- AC Power Adapter
- DC Power Cables
- User Manual

Specifications	
Product Code	GU30WPRO
Input Voltage	100 - 240V AC
DC Output Voltage	5V+USB x1 (2A), 1 x 9V/12V (selectable)(2A), 4 x 12V (2A)
Power Output	30W
Battery Capacity	10400mAh
Battery Information	2600mAh x 4 (Lithium-ion)
Total Watt Hours	38Wh
Estimated Run Time	ONU (3W): 12.6hrs, Router (10W): 3.8hrs, CCTV Cameras (10W): 3.8hrs
Product Dimensions	18.6 x 11 x 3.3 cm

Product Weight	450g

FAQ

What devices can this Mini DC UPS power?

It is designed for compatible routers, fibre ONUs, CCTV cameras and other DC-powered devices with a combined load of up to 30W.

How long will it power a router?

A compatible 10W router can operate for approximately 3.8 hours under typical conditions.

Can I charge my phone using this UPS?

Yes. The built-in 5V USB port can charge compatible USB-powered mobile devices.

Does the UPS include battery protection?

Yes. It features intelligent protection against over-charge, over-discharge and short circuits to help protect both the UPS and connected devices.

Is this suitable for load shedding?

Yes. It is specifically designed to keep essential networking and security equipment running during load shedding and power interruptions.
