Specifications

About this product

The Hisense HS1800 2.1 Channel Soundbar delivers 140W max audio output with a wireless subwoofer, HDMI ARC connectivity, Bluetooth streaming, and USB playback. Designed to enhance TV audio clarity and bass performance, this compact soundbar system provides immersive sound for movies, music, and gaming while supporting flexible installation and simple device connectivity.

Overview Summary

Hisense HS1800 2.1 Channel 140W Soundbar with Wireless Subwoofer

The Hisense HS1800 soundbar is designed to improve television and entertainment audio with a powerful 140W 2.1 channel system. It combines dual speakers with a wireless subwoofer to produce balanced sound with enhanced bass response. The Bass Boost function improves low frequency output, helping deliver clearer dialogue and impactful audio for movies, series, music streaming, and gaming.

Connectivity is simplified with HDMI ARC support, allowing audio to transmit through a single cable connection to compatible TVs. Bluetooth streaming allows wireless audio playback from smartphones, tablets, and laptops, while the USB port supports direct playback of stored audio files. The compact and modern design allows the soundbar to fit easily into home entertainment setups.

Performance tier: Mid-range home entertainment audio

Uses:TV audio upgrade, home entertainment, movie viewing, music streaming, gaming audio

Description

The Hisense HS1800 2.1 Channel Soundbar is built to deliver improved television audio with a combination of powerful output and simple connectivity. The system features two main speakers and a dedicated wireless subwoofer, designed to produce balanced mid and high frequencies along with deep bass for immersive listening. The 140W maximum power output supports

louder and clearer sound compared to standard television speakers.

The wireless subwoofer allows flexible placement without the need for audio cables, helping improve low frequency performance and providing a cinematic sound experience. The Bass Boost feature enhances bass levels, making it suitable for action movies, music playback, and gaming environments where deeper sound effects improve immersion.

HDMI ARC connectivity simplifies installation by allowing the soundbar to receive audio directly from a compatible television using a single HDMI cable. Additional connectivity options include Bluetooth streaming for wireless audio playback, USB playback for media files, and a 3.5mm auxiliary input for external audio devices. The compact design and LED indicator provide easy operation while maintaining a clean home entertainment setup.

Features

The Hisense HS1800 soundbar integrates multiple features designed to improve audio clarity, usability, and connectivity across various entertainment devices.

- 140W Audio Output: Provides louder and clearer sound performance suitable for movies, music, and gaming.
- 2.1 Channel Audio System: Dual speakers combined with a wireless subwoofer produce balanced and immersive sound output.
- Wireless Subwoofer: Improves bass response and allows flexible placement without additional audio cables.
- Bass Boost Function: Enhances low frequency sound for stronger bass impact.
- HDMI ARC Support: Enables audio transmission through a single HDMI cable for simplified installation.
- Bluetooth Streaming: Supports wireless audio playback from smartphones, tablets, and laptops.
- USB Playback: Allows direct playback of audio files from USB storage devices.
- Auxiliary Input: Supports additional wired connections using 3.5mm audio devices.
- LED Indicator Display: Provides clear system status and operating feedback.
- Compact Soundbar Design: Fits easily into home entertainment spaces without occupying excessive space.

Bluetooth
Bluetooth connectivity allows you to wirelessly connect your Hisense TV to external devices like speakers, headphones, and keyboards. Enjoy a clutter-free setup with seamless streaming of audio and easy control from your mobile devices.

HDMI Output with ARC
HDMI Output with ARC (Audio Return Channel) simplifies your audio setup by allowing audio to be sent directly from your TV to your sound system via a single HDMI cable. This feature ensures high-quality sound while reducing cable clutter.

USB
USB connectivity allows you to play audio files directly from a USB drive. This feature offers a simple way to enjoy your digital music collection on your audio system.

Wireless Subwoofer
The Wireless Subwoofer provides deep, rich bass without the hassle of wires. It connects seamlessly to your audio system, enhancing your listening experience with powerful low-end sound, perfect for movies, music, and gaming.

FAQ

Does the Hisense HS1800 soundbar support wireless audio streaming?

Yes, the HS1800 supports Bluetooth wireless streaming.

This allows users to play audio directly from compatible smartphones, tablets, and laptops without using cables.

Can the Hisense HS1800 connect to a TV using HDMI?

Yes, the HS1800 includes HDMI ARC support.

This allows audio to transfer from a compatible television using a single HDMI cable for simplified setup and control.

Does the soundbar include a separate subwoofer?

Yes, the system includes a wireless subwoofer.

The subwoofer enhances bass output and can be placed separately from the soundbar for improved sound distribution.

Is USB audio playback supported?

Yes, the HS1800 supports USB playback.

Users can play supported audio files directly from USB storage devices connected to the soundbar.

What type of content is the HS1800 best suited for?

The HS1800 is designed for home entertainment audio enhancement.

It is suitable for watching movies, streaming television shows, listening to music, and improving gaming audio clarity.
