Logitech G29 Racing Wheel for Sony PS3/PS4 - USB

Product Overview

Logitech G29 Racing Wheel for PS5 / PS4 / PC - USB, Dual-motor Force feedback, Solid Steel ball bearings + Stainless Steel paddle shifters and pedals, Helical gears with anti-backlash, Responsive floor pedal unit, 941-000112

Specifications

Overview Summary:

The Logitech G29 Racing Wheel delivers an immersive driving simulation experience for PS5, PS4, PS3 and PC gamers. With dual-motor force feedback, 900degrees wheel rotation, a hand-stitched leather wheel and responsive three-pedal unit, it provides precise and realistic control for racing games.

Built with durable steel components, stainless steel paddle shifters and secure mounting options, the G29 is ideal for serious racing enthusiasts. Buy now and upgrade your racing setup with realistic steering, acceleration, braking and gear control. Shop now in South Africa.

Performance tier:High-performance racing simulation

Uses:Racing games, driving simulation, sim racing, competitive gaming, home gaming setups

Overview:

The Logitech G29 Racing Wheel for PS5, PS4 and PC is designed for gamers who want a more realistic and immersive driving experience. With a 900-degree steering range, dual-motor force feedback, a hand-stitched leather wheel and responsive floor pedals, the G29 brings greater control and realism to racing games. Its solid construction, stainless steel controls and smooth helical gearing make it well suited to everything from casual racing to dedicated simulation setups.

Description:

The Logitech G29 Racing Wheel combines precise steering control with realistic force feedback to create a convincing driving experience. The dual-motor system lets you feel changes in terrain, tyre grip and wheel movement, helping you react more naturally during races. A solid steel ball-bearing construction adds durability and a substantial feel, while the stainless steel paddle shifters provide quick gear changes without taking your hands far from the wheel.

The wheel is finished with hand-stitched leather for a comfortable, premium feel during longer gaming sessions. Its 900-degree rotation allows the steering movement to closely resemble that of a real car, giving drivers more precise control through corners and during high-speed manoeuvres.

The separate floor pedal unit includes throttle, brake and clutch pedals, allowing you to adopt a more natural driving position. The pedals are designed to provide progressive control, making acceleration, braking and clutch operation feel more deliberate than using a standard game controller.

Features:

Logitech G29 Racing Wheel for PS5, PS4 and PC

The G29 is built for use with PlayStation and PC racing games, offering a practical solution for players who want to move beyond traditional controllers. Its combination of force feedback, rotational range and dedicated pedals provides a more engaging racing simulation experience.

Key details include:

- 900-degree wheel rotation for realistic steering control
- Dual-motor force feedback for road and tyre feedback
- Hand-stitched leather steering wheel
- Solid steel ball bearings in the wheel shaft

ComX Computers

Product Specification Sheet

- Stainless steel paddle shifters
- Separate throttle, brake and clutch pedals
- Smooth helical gearing with anti-backlash design
- Compatible with PS5, PS4, PS3 and PC
- Built-in table clamps and screw mounting points

Realistic Force Feedback and Steering

Dual-motor force feedback gives the Logitech G29 a more detailed connection between the driver and the virtual car. Changes in road surface, tyre slip and vehicle movement can be felt through the steering wheel, allowing you to respond to what is happening on the track.

The 900-degree rotation provides a wide steering range that is particularly useful in racing simulators where accurate and controlled steering inputs matter. The helical gear system also helps provide smooth and quiet operation while reducing unwanted movement through its anti-backlash design.

Leather Steering Wheel and Steel Controls

The G29 uses a hand-stitched leather covering around the steering wheel, giving it a more comfortable and premium finish. Solid steel ball bearings inside the wheel shaft contribute to its robust construction, while the stainless steel paddle shifters are designed for fast and precise gear changes.

Together, these materials give the Logitech G29 a substantial feel that is suited to regular racing and simulation use.

Responsive Three-Pedal Floor Unit

A separate pedal assembly provides throttle, brake and clutch controls for a more authentic driving setup. Having the pedals positioned on the floor allows you to maintain a more natural driving posture while giving each control its own dedicated input.

This setup is especially useful for racing games that support manual transmissions, clutch control and more advanced driving simulation mechanics.

Secure Desk and Racing Rig Mounting

The Logitech G29 can be securely attached to a desk or racing cockpit using its built-in clamps or screw mounting points. This helps keep the wheel stable during aggressive steering movements and intense racing sessions.

The wheel, pedals and optional shifter can also be used with compatible racing simulation cockpits, including Playseat-style setups, making the G29 suitable for building a dedicated home racing station.

Optional 6-Speed Shifter

For players looking for an even more realistic manual driving experience, the Logitech Driving Force Shifter can be added separately. It provides a short-throw six-speed H-pattern layout with a push-down reverse gear, giving compatible racing games a more traditional manual transmission feel.

Compatibility and Part Number

The Logitech G29 Racing Wheel is designed for PS5, PS4, PS3 and PC gaming. The product part number / SKU is LOG-941-000112, also identified as 941-000112.

Whether you are upgrading from a gamepad or building a dedicated racing simulator, the Logitech G29 provides the steering, pedal control and force feedback needed for a more immersive driving experience.

Specifications

Product Code	LOG-941-000112
DIMENSIONS	WHEEL
	Rotation: 900 degrees lock-to-lock
	Hall-effect steering sensor
	Dual-Motor Force Feedback
	Overheat safeguard
	PEDALS
	Nonlinear brake pedal
	Patented carpet grip system
	Textured heel grip
	Self-calibrating
	PHYSICAL SPECIFICATIONS
	WHEEL
	Height: 270 mm
	Width: 260 mm
	Depth: 278 mm
	Weight without cables: 2.25 kg
	Pedals
	Height: 167 mm
	Width: 428.5 mm
	Depth: 311 mm
	Weight without cables: 3.1 kg
TECHNICAL SPECIFICATIONS	MATERIALS
	Wheel spokes: Anodized aluminum
	Wheel cover Hand-stitched leather
	Steering shaft: Steel
	Mounting clamps: Glass-filled nylon
	Shifter paddles: Brushed stainless steel
	Pedal frames and arms: cold rolled steel
	Pedal faces: Brushed stainless steel
	Pedal piston sleeves: Polyoxymethylene thermoplastic (POM)
PART NUMBER	Black PS5 / PS4 / PC: 941-000112
	Black Xbox Series X, S /Xbox One/PC: 941-000123
