Specifications

About this product

The Aavara PT400 Projector Mount Extended Pole is designed to extend the installation length of the Aavara PL320 ceiling projector mount from 755mm to 955mm, providing greater installation flexibility for high ceilings and specialized projector setups. Its lightweight aluminum alloy construction, in-tube cable management, and simple installation make it an ideal accessory for professional projector installations. Buy now from our website for quick delivery in South Africa.

Overview Summary

Aavara PT400 Projector Mount Extended Pole for PL320

The Aavara PT400 is an extension pole designed specifically for use with the Aavara PL320 ceiling projector mount. It increases the overall mounting length to an adjustable range of 755mm to 955mm, making it suitable for installations where additional ceiling clearance is required.

Constructed from lightweight aluminum alloy, the PT400 features an in-tube smart cable management system to keep projector cables neatly concealed while maintaining a clean professional appearance. It is easy to install and supports the same 15kg maximum load capacity as the compatible PL320 projector mount.

Performance tier: Professional projector mounting accessory

Uses: Projector ceiling installations, conference rooms, classrooms, boardrooms, auditoriums, home theatre installations

Overview

Aavara PT400 is an extended tube for PL320. It gives a flexibility in extension of your projector ceiling mount length max. up to 955mm to fully fulfill the special project installation demand. Easy to install.

Description

ComX Computers

Product Specification Sheet

The Aavara PT400 is an optional extension pole developed specifically for the Aavara PL320 ceiling projector mount. It allows installers to increase the overall drop distance for projector installations where standard ceiling mount length is insufficient.

Manufactured from durable aluminum alloy, the PT400 offers an excellent balance between strength and lightweight construction. The integrated in-tube cable management system keeps power and video cables hidden inside the extension pole, resulting in a neat and professional installation while helping to protect cables from accidental damage.

The extension pole is suitable for commercial, education, business, and home entertainment environments where projectors need to be positioned further from the ceiling to achieve the correct image size and projection distance. Installation is straightforward and integrates seamlessly with the compatible Aavara PL320 ceiling mount.

Features

Product Specification Sheet

the mounting range.

How much weight can the PT400 support?

The PT400 supports a maximum load capacity of 15kg when used with the compatible mounting system. This makes it suitable for a wide range of standard ceiling mounted projectors.

Does the PT400 include cable management?

Yes. The extension pole includes an in-tube smart cable management system that helps conceal and protect projector cables for a clean installation.

Is the PT400 suitable for home and commercial installations?

Yes. It is suitable for home theatres, classrooms, offices, meeting rooms, conference facilities, and commercial AV installations where additional mounting length is required.
