Cooler Master MasterBox 600 ATX Case - White

Product Overview

Cooler Master MasterBox 600 ATX Case - White, Tempered Glass side panel, 7 Expansion slots, 2x 3.5" Drive bays, 2 2.5" Drive bays, I/O panel - 2x USB 3.2 Gen 1 Type-A / 1x USB 3.2 Gen 2x2 Type-C / 1x 3.5mm Combo, ARGB fans Hub, 170mm clearance - CPU Cooler, 170mm clearance - PSU, 360mm clearance - Graphics, 33-35 mm cable routing - behind Motherboard Tray

Specifications

Overview Summary:

The Cooler Master MasterBox 600 White ATX case combines sleek design with superior airflow and versatile cooling options. Its tempered glass side panel and ARGB fans create a stylish look while supporting up to seven fans and large radiators. With room for multiple drives and easy cable management, this mid-tower case makes building or upgrading your PC straightforward and enjoyable. Shop now to elevate your system with both performance and aesthetics.

Experience exceptional compatibility with graphics cards up to 410mm, CPU coolers up to 170mm, and full support for ATX, Micro ATX, and ITX motherboards. The removable HDD cage and front mesh panel provide convenient access and improved thermals for demanding setups. Buy now to enjoy a case that balances style, cooling efficiency, and upgrade flexibility.

Performance tier:High-end

Uses:Gaming PC builds, Workstations, Custom PC assembly, High-performance cooling setups, Aesthetic showcase builds

Overview:

MasterBox 600 ATX Case - White with Tempered Glass

The Cooler Master MasterBox 600 is a sleek and versatile ATX case designed for gamers and PC builders seeking a balance of style, performance, and expandability. Its modern white design, tempered glass side panel, and fine mesh front panel combine aesthetics with excellent airflow, making it ideal for high-performance builds. This case supports a wide range of components and offers flexible cooling options to maintain optimal system temperatures during heavy use.

Description:

The MasterBox 600 provides ample space for back-connected motherboards, improving cable management with 33-35mm of routing space behind the tray. It comes equipped with SickleFlow fans to ensure consistent airflow and a removable HDD cage that supports up to 2x 3.5" drives and 6x 2.5" SSDs. The case allows installation of up to seven 120mm fans, supports 360mm radiators on top, 420mm radiators in front, and accommodates graphics cards up to 410mm and CPU coolers up to 170mm. Its design emphasizes easy upgrades, efficient cooling, and a clean interior for professional-looking builds.

Features:

Space for Components and Upgrades

This ATX case is built to handle modern hardware with ease. Users can install large graphics cards, tall CPU coolers, and multiple storage drives without compromising airflow or build quality. The removable HDD cage adds flexibility during assembly

or when upgrading storage.

Enhanced Cooling Performance

With three 140mm SickleFlow fans and an additional CF120 fan included, the MasterBox 600 delivers exceptional cooling right out of the box. Its fine mesh front panel and strategically placed vents provide unrestricted airflow to keep components running efficiently, even under heavy load.

Flexible Fan and Radiator Support

The case supports up to seven 120mm fans, offering multiple configurations for custom cooling setups. It also accommodates large radiators-360mm on top and 420mm in front-ensuring compatibility with liquid cooling systems for advanced builds.

Clean and Organized Interior

Back-connected motherboard support frees up space in front of the case and allows for improved cable management. With 33-35mm of space behind the motherboard tray, builders can route cables neatly, reducing clutter and enhancing airflow.

Modern Connectivity Options

The front I/O panel includes 2x USB 3.2 Gen 1 Type-A ports, 1x USB 3.2 Gen 2x2 Type-C port, and a 3.5mm audio combo jack, providing convenient access to peripherals and high-speed devices.

Stylish Design with Practical Functionality

The MasterBox 600 combines a tempered glass side panel with a clean white finish and mesh front, offering both visual appeal and thermal efficiency. Its design ensures that components are showcased while staying cool and well-ventilated.
