Product Overview

Apple HomePod Mini - Yellow, Acoustically Transparent fabric, Computational audio for Real-Time tuning, Four-microphone design for far-field Siri, Multiroom audio with AirPlay 2, Stereo pair capable, Full-range Driver and Dual passive radiators

Specifications

About this product

The Apple HomePod Mini in Yellow delivers rich, immersive sound in a compact, elegantly designed speaker. Featuring a full-range driver with dual passive radiators, computational audio for real-time tuning, and a four-microphone array for far-field Siri, it is perfect for multiroom setups and stereo pairing. Control your music, podcasts, and smart home devices seamlessly with Siri and AirPlay 2.

Overview Summary

Apple HomePod Mini - Yellow combines powerful sound with intelligent features in a small form factor. Its acoustically transparent fabric and custom acoustic waveguide create 360° sound, while computational audio optimizes performance in real-time. Multiroom audio with AirPlay 2 and stereo pair capability let you enjoy music throughout your home.

Uses: Home audio, smart assistant, music streaming, intercom, stereo pairing

Description

The Apple HomePod Mini in Yellow is a compact smart speaker designed to fit anywhere in your home. Its acoustically transparent mesh fabric allows sound to flow freely, while computational audio and a full-range driver with dual passive radiators deliver deep bass and crisp high frequencies. Far-field Siri allows voice commands from across the room, and multiple HomePod Mini speakers can be connected for multiroom audio or stereo pairing.

Features:

HomePod mini is designed to fit anywhere in the house. Its elegant shape is wrapped in a perfectly seamless mesh fabric that's virtually transparent to the sound passing through it. A backlit touch surface on the top provides quick control.

With multiple HomePod mini speakers placed around the house, you can have a connected sound system for your whole home. Ask Siri to play one song everywhere or, just as easily, a different song in each room.

Having powerful audio everywhere in the house couldn't be simpler and each HomePod mini gives you total control, no matter where you are. HomePod mini also works with your Apple devices for features like Intercom, letting you quickly communicate by voice.

Pick up an incoming call from your iPhone, kick back with your favorite shows on Apple TV, listen to music on your Mac - HomePod mini works effortlessly with all your Apple devices and experiences to take your sound to the next level. You can even create a stereo pair - two HomePod mini speakers paired in the same room create left and right channels for fully immersive audio.

If you're enjoying music or a podcast and have to head out, you can continue to listen on your iPhone without missing a beat. Hand it off simply by bringing your iPhone close to HomePod mini. You'll experience the feeling of your iPhone and HomePod mini connecting virtually as the sound transfers.

Personalized listening suggestions will also automatically appear on your iPhone when you hold it next to HomePod mini. You'll have instant control at your fingertips without having to unlock your iPhone.

Siri is your do-it-all intelligent assistant that puts HomePod mini at the center of your family's activities. And with multiple HomePod mini speakers around the house, it's easy to call on Siri from anywhere. HomePod mini and Siri can do even more by seamlessly connecting to your iPhone, and Apple Music Voice gives you access to every song in the catalog all with just your voice.

ComX Computers

Product Specification Sheet

Siri can recognize the voices of up to six different family members on HomePod mini - and create a personalized experience for each person. So the music Dad hears when he asks for something hed like is totally different from what the kids hear when they ask. And with Personal Requests, Siri can recognize a particular voice and relay that persons information from iPhone apps like Messages, Calendar, Reminders, and Contacts. And of course, HomePod mini keeps your information private and secure.

With more than one HomePod mini in the house, you can easily communicate with your family members by voice using Intercom. Ask Siri to send your message to the whole house or to individual rooms - and everyone can easily respond.

FAQ

Can multiple HomePod mini speakers be used together?

Yes, you can set up multiple HomePod mini speakers for multiroom audio or create a stereo pair for immersive left/right sound.

Does HomePod mini work with Apple devices?

Yes, it works seamlessly with iPhone, iPad, Apple TV, and other HomeKit-compatible devices.

Can I use Siri to control my smart home devices?

Yes, far-field Siri lets you control smart home devices, play music, send messages, and more.

Does it support third-party music services?

Yes, you can stream music via Apple Music, iTunes, podcasts, radio stations, and compatible third-party apps.
