Specifications

Features:

iPhone 15. Newphoria.

iPhone 15 brings you Dynamic Island, a 48MP Main camera, and USB-C all in a durable color-infused glass and aluminum design.

Dynamic Island comes to iPhone 15

Dynamic Island bubbles up alerts and Live Activities so you don't miss them while you're doing something else. You can see who's calling, check your flight status, and so much more.

Innovative Design

iPhone 15 features a durable color-infused glass and aluminum design. It's splash, water, and dust resistant.⁽¹⁾ The Ceramic Shield front is tougher than any smartphone glass. And the 6.1" Super Retina XDR display is up to 2x brighter in the sun compared to iPhone 14.

48MP Main camera with Telephoto

The 48MP Main camera shoots in super high resolution. So it's easier than ever to take standout photos with amazing detail. The 2x optical-quality Telephoto lets you frame the perfect close-up.

Next Generation Portraits

Capture portraits with dramatically more detail and color. Just tap to shift the focus between subjects even after you take the shot.

Powerhouse A16 Bionic Chip

The superfast chip powers advanced features like computational photography, fluid Dynamic Island transitions, and Voice Isolation for phone calls. And A16 Bionic is incredibly efficient to help deliver great all-day battery life.

USB-C Connectivity

The USB-C connector lets you charge your Mac or iPad with the same cable you use to charge iPhone 15. You can even use iPhone 15 to charge Apple Watch or AirPods.

Vital Safety Features

With Crash Detection, iPhone can detect a severe car crash and call for help if you can't.

Designed to make a difference

iPhone comes with privacy protections that help keep you in control of your data. It's made from more recycled materials to minimize environmental impact. And it has built-in features that make iPhone more accessible to all.
