Overview Summary

LinkQnet NET-PUNCH-110-LQ Impact & Punch Down Tool (Krone Type) is a reliable hand tool built for precise and secure network cable termination using Krone-style connectors. It gives technicians the control and force needed for clean, consistent results.

This tool is designed for use in telecommunications, patch panels, and network cabinets. It is ideal for both home networking tasks and professional installations. The blade cuts excess wire while pushing termination duty, helping reduce time and improve finish.

It features durable materials and a design that balances usability and strength. For anyone working often with Krone blocks, this is a solid investment that promotes performance and value.

Performance tier: Basic trade / semi professional

Uses: terminating network cables, patch panel wiring, telecommunication blocks, Krone style connection jobs

Features

The key features of the NET-PUNCH-110-LQ tool that make it a useful choice for cable installation and termination projects:

ComX Computers

Product Specification Sheet

- Impact mechanism: delivers a spring-loaded punch action to seat wires firmly into Krone blocks and then cut off excess wire cleanly.
- Krone-type blade: compatible with Krone style punch-down blocks and modules for secure connections.
- Ergonomic handle: designed for grip comfort during repeated use, helping reduce hand fatigue.
- Durable construction: suitable for repeated terminations in trade or workshop environments.
- Value pricing: a cost effective tool for both small jobs and larger network installations.

Description

The LinkQnet NET-PUNCH-110-LQ combines punch-down and impact action to produce fast, clean terminations of Krone-style connectors. Designed for both professional and DIY network work, this tool allows users to seat wires firmly into IDC contacts and cut off excess simultaneously. It helps reduce the chances of loose wires or over-trimmed strands, leading to more reliable connections.

It is especially useful in telecommunications cabinets, patch panel installations, and when working on backbone or branch network wiring. For home network upgrades or commercial projects alike, this tool smooths the process, reducing rework and increasing efficiency.
