High-Efficiency Path Planning

Smart systematic navigation guides RV10 to organize a neat zigzag route for higher cleaning efficiency and fewer omissions compared with random-path robotic vacuums.

4-Level Suction for Flexible Needs

Four vacuum modes with different levels of suction power meet various cleaning needs. With a maximum suction power of 2000Pa, Tapo RV10 is ideal for direct, powerful cleaning of carpets and hard floors.

- Auto-Boost to Max Mode when encountering carpets for a deep clean.
- HEPA Filter captures 99.9% of allergens as small as 0.3 microns.
- Floating Suction Mouth sticks closely to the ground to remove gap dust.
- Detachable Main Brush makes it easy to clean the tangled hair for improved maintenance.

Vacuum and Mop Combo

Vacuuming sucks up floating dust and mopping tackles sticky messes. Mopping is essential for homes with hard floors that need regular polishing. With an electronic pump, RV10 provides 3 water flows to suit different floor types with consistent and steady water pressure.

- 300 ml Water Tank Capacity
- 200 m / 2100 ft Mopping Coverage
- 3 Water Flows Electronic Mopping
