Specifications

Overview:

Strategize and reach your targets easily with the PCBuilder Intel i3-12100 OFFICE MASTER Core Windows 11 Pro Desktop PC. This pre-built desktop PC is designed for use at home or in the office and is powered by an Intel i3-12100 CPU with built-in Intel graphics. It also comes with an H610 chipset motherboard, 8GB of high-speed DDR4 memory, and a 500GB M.2 NVMe SSD.

Built with efficiency in mind so you can reach your deadlines on time, this pre-built PC has everything you need to hit those daily targets. With Microsoft Windows 11 already installed, you can also run the latest versions of all your apps with more features and better security. Its built-in Intel graphics are also a great option for presentations and video content or editing.

The OFFICE MASTER Core features an Intel i3-12100 CPU and DDR4 memory, which will ensure that every task gets completed quickly and efficiently. With 4 cores and 8GB of DDR4 memory, no task is too much for it to handle. Data can be transferred and applications can be loaded at lightning-quick speeds thanks to the included 500GB M.2 NVMe SSD. This makes using apps like Microsoft Word and Excel run even more smoothly, so you can get more work done.

All the components are held together with a high-performance Intel LGA1700 Motherboard with Lightning Gen 4 support. The motherboard delivers an efficient and productive experience with stable functionality and maximum performance. Everything is protected and held together inside a sleek-looking Micro-ATX Chassis. This modern-looking compact chassis is easy to maintain and upgrade, while its smaller form factor is great for saving some space in the home or office.

The OFFICE MASTER Core comes installed with Windows 11 which has easy-to-use tools that can help you optimize your screen space and maximize your productivity. It features great tools like Microsoft Edge, the new and improved Microsoft Store, Snap Layouts to arrange your open windows into grids, Desktops for better organization, as well as Widgets.

Windows Security also offers advanced protections to defend against today's ever-changing cyber threats. This includes device encryption, find my device, firewall and network protection, internet protection, parental controls, secure boot, and Windows Hello among other features.

Norton Security Software is designed to protect your connected device as well as your personal information and offers more powerful layers of protection from ever-changing threats. It can protect your PC or Mac from viruses, ransomware, malware, and other online threats while you bank, shop and browse the internet. It ensures that your personal device is protected from unauthorized access to your personal files and the financial information it stores with the Smart Firewall.
