With up to 14 hours of playtime, IP68 water and dust resistance, Bluetooth 6.0 and hands-free calling, it is ready for everyday listening, outdoor entertainment and parties.

Link compatible speakers with Auracast for synchronised audio or pair two units for stereo sound. Compact and lightweight with a carry strap, the Xiaomi Sound Play is easy to take wherever the music goes. Shop now and bring bigger sound and colourful ambience to your next playlist.

**Performance tier:**Mid-range portable audio

**Uses:**Music streaming, parties, outdoor entertainment, travel, everyday listening, stereo pairing, hands-free calls

### Overview:

#### Xiaomi Sound Play 18W Portable Bluetooth Speaker - Purple

The Xiaomi Sound Play is a compact portable Bluetooth speaker that combines 18W room-filling audio, deep bass, dynamic RGB lighting and long battery life in a lightweight design. With up to 14 hours of playback, IP68 water and dust resistance, Bluetooth 6.0 and Auracast multi-speaker connectivity, it is well suited to home listening, parties and outdoor use.

### Description:

The Xiaomi Sound Play 18W Bluetooth speaker delivers powerful audio from a compact 415 g body. Its racetrack-style full-range speaker works with internal and external passive radiators to produce punchy bass and a fuller soundstage, while Bluetooth 6.0 provides a fast and stable wireless connection with a range of up to 25 m.

Music becomes part of the visual experience with the built-in WRGB lighting system. An infinity mirror light on the top works alongside an ambient glow ring on the bottom, with lighting effects that can respond to the rhythm of your music. Ripple, beat and constant modes allow the speaker to suit everything from relaxed listening to a lively party.

Designed for more than just indoor listening, the Xiaomi Sound Play has an IP68 water and dust resistance rating, making it a practical choice for outdoor environments. The 2600 mAh battery provides approximately 14 hours of playback under specified conditions, while USB Type-C charging makes it easy to recharge between uses.

### Features:

#### Powerful 18W Sound in a Compact Speaker

Despite its small footprint, the Xiaomi Sound Play produces an impressive 18W of output. The racetrack-style full-range driver and dual passive radiator design help create strong low frequencies and clear, detailed audio without requiring a larger speaker enclosure.

The speaker is easy to carry at just 415 g and includes a soft rubber carry strap, making it convenient to take to a gathering, outdoor activity or another room in the house.

#### Bluetooth 6.0 Wireless Audio

Bluetooth 6.0 provides a reliable wireless connection with low latency and high-quality audio transmission. With a transmission range of up to 25 m, you can keep your connected device nearby without having to remain directly beside the speaker.

The built-in microphone also allows hands-free calling, adding useful functionality when the speaker is connected to your smartphone.

**Auracast Multi-Speaker Party Mode**

For larger gatherings, Auracast allows compatible Xiaomi Sound Play speakers to be connected together. Up to 100 compatible speakers can be linked for synchronised audio and lighting, making it possible to create a much larger sound setup across a room or venue.

Two Xiaomi Sound Play speakers can also be connected using TWS pairing to create left and right stereo channels for a more immersive listening experience.

**Music-Synchronised RGB Lighting**

The Xiaomi Sound Play adds a visual element to your music through its dual-zone lighting system. The top infinity mirror light creates a distinctive depth effect, while the lower ambient glow ring provides additional illumination.

The WRGB multi-colour system supports dynamic lighting effects that respond to the music. Ripple, beat and constant modes let you adjust the atmosphere depending on how and where you are using the speaker.

**Designed for Indoor and Outdoor Use**

An IP68 water and dust resistance rating provides added protection when the speaker is used around water or in dusty environments. This makes the Xiaomi Sound Play a practical option for outdoor gatherings and everyday portable listening.

Its 2600 mAh battery delivers up to approximately 14 hours of playback when measured at 40% volume with the lights switched off. Charging is handled through USB Type-C and takes approximately 2.5 hours using a 5 V / 2 A connection.

Key technical details include:

- 18W racetrack-style full-range speaker
- Internal and external passive radiators for enhanced bass
- Bluetooth 6.0 wireless connectivity
- Wireless transmission range of up to 25 m
