Xiaomi Sound Play Speaker 18W - White

Product Overview

Xiaomi Sound Play Speaker 18W - White, 18W Output Power, 14 hours Battery Life, IP68 Water/dust resistance, Bluetooth, Light show / RGB

Specifications

Overview Summary:

The Xiaomi Sound Play 18W Speaker in White delivers powerful portable audio with up to 14 hours of playback, Bluetooth 6.0 connectivity and IP68 water and dust resistance. Its compact, lightweight design makes it easy to take your music anywhere, while dynamic RGB lighting adds a visual element to your listening experience.

Perfect for home listening, gatherings and outdoor entertainment, the Xiaomi Sound Play also supports stereo and multi-speaker pairing for a more immersive setup. Buy now or shop now for portable sound with a distinctive light show.

Performance tier: Mid-range

Uses:home audio, parties, outdoor music, travel, gatherings, hands-free calls

Overview:

18W immersive sound | Beat-synced 3D ambient lighting | Up to 14 hours playtime | IP68 water & dust resistance | Auracast multi-speaker party mode

Description:

The Xiaomi Sound Play 18W Speaker in White combines powerful portable audio with eye-catching RGB lighting and durable outdoor protection. Its 18W racetrack-style full-range speaker, supported by internal and external passive radiators, delivers rich sound with punchy bass from a compact 415 g design. Bluetooth 6.0 provides a stable wireless connection, while Auracast allows up to 100 compatible Xiaomi Sound Play speakers to work together for synchronised audio and lighting. With up to 14 hours of playback, IP68 water and dust resistance, hands-free calling and TWS stereo pairing, it is suited to everyday listening, parties and outdoor use.

Features:

Powerful 18W Portable Sound
The Xiaomi Sound Play is designed to deliver room-filling audio without the size and weight of a traditional speaker. The 18W racetrack-style full-range driver works with internal and external passive radiators to create a wider soundstage, warm mids and strong low-end performance.

At just 415 g, the speaker is easy to carry in a bag or take between rooms. The soft rubber carry strap also makes it convenient for outdoor activities, gatherings and travel.

Bluetooth 6.0 Wireless Audio
Bluetooth 6.0 provides fast and reliable wireless connectivity with low latency and high-quality audio transmission. With a transmission range of up to 25 m, you can keep your smartphone or other compatible device connected while moving around.

The built-in microphone also allows hands-free calls, making the Xiaomi Sound Play more versatile than a speaker designed purely for music playback.

Music-Synced RGB Light Show
The Xiaomi Sound Play adds a visual element to your music with two independent lighting zones. An infinity mirror light is positioned on top of the speaker, while a bottom ambient glow ring provides additional illumination.

The lighting responds dynamically to your music and includes ripple, beat and constant modes. WRGB multi-colour lighting

lets the speaker create different visual effects for relaxed listening or larger parties.

Up to 14 Hours of Battery Life
A built-in 2600mAh battery provides approximately 14 hours of playback on a single charge when measured at 40% volume with the lights switched off. This gives you plenty of listening time for a day out, a gathering or extended use around the home.

Charging is handled through USB Type-C and takes approximately 2.5 hours using 5 V / 2 A power.

Auracast Multi-Speaker Party Mode
For larger events, Auracast technology allows up to 100 Xiaomi Sound Play speakers to be connected for synchronised audio and lighting. This makes it possible to spread music across a larger space while keeping the playback in sync.

For a smaller stereo setup, TWS pairing allows two compatible Sound Play speakers to operate as left and right channels for a more immersive stereo experience.

IP68 Water and Dust Resistance
The IP68 water and dust resistance helps protect the speaker when used outdoors or in demanding environments. Whether you are taking it to a gathering, using it around the pool area or bringing it on an outdoor adventure, the durable design provides added peace of mind.

Key Technical Points

- 18W racetrack-style full-range speaker with internal and external passive radiators
- Bluetooth 6.0 wireless connectivity with transmission range of up to 25 m
- Auracast support for connecting up to 100 compatible speakers
