Specifications

About this product

The Armaggeddon Raven III Sigma White Wired Gaming Mouse (RAVENIIISIGMAWHT) is a high-performance gaming mouse featuring adjustable sensitivity from 1200 to 12800 CPI, programmable macro functions, silent switches and customisable RGB lighting. Its 5-button design with 2-way click scroll provides versatile control for gaming and everyday computer use, while the durable 1.8m cable offers a reliable wired connection. Finished in white with a matt UV coating, this USB gaming mouse is a practical choice for PC gamers seeking responsive control and personalised lighting. Buy online today and upgrade your gaming setup.

Overview Summary

Armaggeddon Raven III Sigma White Gaming Mouse

The Armaggeddon Raven III Sigma is a wired gaming mouse designed for PC gaming, everyday navigation and customisable control. It features the Armaggeddon 199 Gaming Engine, adjustable sensitivity ranging from 1200 to 12800 CPI, a 4000 FPS frame rate and 15G acceleration for responsive cursor tracking during gameplay.

Five buttons and a 2-way click scroll provide flexible input options, while macro support allows compatible commands to be customised. Silent switches help reduce clicking noise, and programmable RGB lighting adds a personalised look to your gaming desk. The white finish, 90g weight and 1.8m cable make it a practical addition to a wired gaming setup.

Performance tier:Entry-level gaming

Uses:PC gaming, casual gaming, everyday computing, web browsing, productivity, programmable gaming controls

Description

The Armaggeddon Raven III Sigma White Wired Gaming Mouse combines adjustable tracking sensitivity, customisable

Product Specification Sheet

controls and distinctive RGB lighting in a compact gaming design. Its white matt UV finish suits clean, modern PC setups, while its wired USB connection provides a direct connection to a compatible computer without requiring a wireless connection or mouse battery.

With sensitivity adjustable from 1200 to 12800 CPI, the mouse allows users to select a cursor speed that suits different games and tasks. Higher sensitivity settings can support faster cursor movement, while lower settings can help with controlled aiming when supported by the game and user preferences.

The five-button layout and 2-way click scroll provide additional control options. Macro functionality allows supported commands or sequences to be assigned for compatible gaming tasks. Silent switches help minimise clicking noise, making the mouse suitable for shared rooms and quieter gaming environments.

The mouse weighs 90g and measures 117 x 65 x 38mm. Its 1.8m ultra-durable cable offers flexibility when positioning the mouse beside a desktop computer or gaming laptop. Whether you are playing games, browsing the web or working at your computer, the Raven III Sigma provides adjustable control in a distinctive white design.

Features

- Adjustable sensitivity: Select from 1200 to 12800 CPI to suit different games and cursor control preferences.
- Armaggeddon 199 Gaming Engine: Gaming-focused tracking technology for responsive mouse control.
- Programmable macro support: Customise supported commands or command sequences for compatible gaming tasks.
- Five-button design: Provides additional input options beyond standard left and right clicks.
- 2-way click scroll: Offers additional scroll control for supported functions.
- Silent switches: Help reduce clicking noise during gaming and everyday computer use.
- Customisable RGB lighting: Personalise the appearance of your gaming setup with programmable lighting.
- 4000 FPS frame rate: Supports the mouse's reported gaming tracking performance.
- 15G acceleration: A specified acceleration rating for responsive movement tracking.
- Durable 1.8m cable: Provides a wired connection with useful reach for desktop setups.
- White matt UV finish: Gives the mouse a clean appearance suited to white gaming accessories.
- 90g weight: Offers a lightweight design for regular mouse movement.

FAQ

Is the Armaggeddon Raven III Sigma a wired or wireless mouse?

It is a wired USB gaming mouse with a 1.8m cable. It does not require a wireless connection.

What is the maximum sensitivity of the Raven III Sigma?

The specified sensitivity range is 1200 to 12800 CPI, allowing users to select a suitable tracking speed for their preferred games and applications.

Does the Armaggeddon Raven III Sigma have RGB lighting?

Yes. It features programmable RGB lighting to personalise the appearance of a compatible gaming setup.

Does this gaming mouse support macros?

Yes. Macro functionality allows supported commands or command sequences to be customised for compatible gaming tasks.

Are the mouse clicks silent?

The Raven III Sigma features silent switches designed to help reduce clicking noise during use.

How many buttons does the Raven III Sigma have?

It has five buttons and a 2-way click scroll design, providing additional control options for supported games and applications.

Will this mouse work with a gaming laptop or desktop PC?

It is designed for wired USB computer use. Check that your computer has a compatible USB port and that your operating system supports the mouse's standard functions. Advanced macro and lighting features may depend on compatible software.

What are the dimensions and weight of this gaming mouse?

The mouse measures 117 x 65 x 38mm and weighs 90g.

Is the Armaggeddon Raven III Sigma suitable for everyday office work?

Yes. In addition to gaming, its adjustable sensitivity, scroll control and wired connection make it suitable for everyday computer tasks, browsing and general productivity.
