Specifications

Features:

Stunning UHD viewing with lifelike vibrant colours

Thanks to Colour Brilliance, you can see everything as nature intended. Tones are reproduced with stunning precision - just like you're really there. Everything you see on the screen is bright and rich. Colours come alive with beautiful intensity and images look natural and lifelike. Now you can dive into ultra-vibrant UHD viewing that is truly brilliant.

UHD upscaling enhances the quality of all of your viewing

Thanks to the Samsung UHD Picture Engine, you can enjoy various kinds of content with near UHD-level picture quality, even if it's not from a UHD source. Samsung's innovative processing enhances broadcast TV shows and movies as well as video on demand and more. That means not only does it process UHD sources at crisp 4K resolution, it even converts lower-resolution content to a level of clarity that's almost like Ultra High Definition.

A more detailed picture made for UHD resolution

Samsung's advanced UHD dimming technology brings the ideal level of contrast and colour to your UHD viewing. The higher resolution of UHD also means that the picture requires more processing for a highly-detailed image. That's why Samsung UHD dimming technology has been developed to process black and white as optimally as possible and produce colours that are far more vivid.

4 times the Full HD resolution

Ultra HD viewing means you can see every intricate detail on the screen clearer than ever. Your Samsung UHD TV offers a resolution four times higher than Full HD, with accurate true-to-life colour. Enjoy a picture that's optimised for even greater clarity and detail than you've ever seen before.

Clear Motion Rate minimises motion blur

Thanks to Samsung's advanced Clear Motion Rate (CMR) technology, even fast moving scenes are delivered with clarity. A higher CMR means clearer viewing and less motion blur, so you can enjoy action films, sports and other entertainment at their very best. This technology is possible due to an enhanced panel refresh rate, image processor speed and backlight technology. That means viewing that's clearly better.

Future Ready

TV technology is always evolving and so does Samsung UHD TV. With UHD Evolution Kit*, your Samsung UHD TV can be updated to be compatible with future UHD standards without buying a new TV. Get ready for future UHD standards with Future Ready*.

An immersive picture that seems to float in mid-air

ComX Computers

Product Specification Sheet

Thanks to Samsung's Aero Design, you can enjoy viewing that is even more immersive and enjoyable than ever before. The Aero stand elevates the picture and makes it appear to float, bringing your entertainment to centre stage. Natural materials and premium detailing means an elegant look that you'll be proud to own, and a low-profile built-in speaker provides great audio from the TV itself.

Great multitasking with Multi-Link Screen (Quad)

Samsung's Multi-Link Screen brings your entertainment experience to a whole new level by providing multiple-screen viewing. The Multi-Link Screen (Quad) feature lets you use up to four different screens simultaneously on the UHD screen however you want. That means that you can watch live TV on one screen while on another you can browse On TV, and with the remaining two screens you can watch video clips from YouTube while searching for more things to watch. Experience the joys of having four UHD TVs in one.

Great multitasking with Multi-Link Screen (Dual)

Samsung's Multi-Link Screen brings your entertainment experience to a whole new level by providing multiple-screen viewing. You can search for information on the internet about a TV show that you're watching on the same screen, or watch recommended video clips related to the live show you're watching simultaneously.

Your TV understands whole sentences of speech ##NLU

Thanks to Samsung's latest Voice Interaction, you can control your TV with more than just one-word commands. If you want to watch a film, just say "find" followed by its title and "movie". If you want to watch TV Channel 7, just say "Channel 7". To visit a website, simply say its web address. You can also use your voice to search weather, sports and stock information* and open apps like YouTube.

Say a keyword to find it with Voice Interaction-----##KWD

Thanks to Samsung's latest Voice Interaction, you can control your TV and find what you want by only saying a word. If you want to watch a movie, just click the Search button on the screen and say its title. To open an app you want to use, such as YouTube, just say its name. If you wish to visit a website, simply say its web address. With Samsung's sophisticated Voice Interaction, it's that easy.

Control your TV easily with voice commands

Thanks to Samsung's latest Voice Interaction, you can use simple spoken commands to control your TV. Use your voice to access a wide range of TV functions including selecting the channel, adjusting the volume level, or switching it off. There are also easy voice commands that play and stop which you're watching.

Easier motion control with finger and hand gestures

With Samsung's latest Motion Control, not only can you control your TV using hand movements, you can even use a range of simple finger gestures. Enhanced Motion Control recognises even finger movements, so a finger is all it takes to select the channel or volume level, load apps, scroll webpages and navigate Smart Hub.

Be entertained quicker with faster startup

Now you can get straight to your entertainment quicker than ever. Instant On means your Samsung Smart TV boots up in less than 2 seconds. That's much faster than the 2013 Samsung Smart TV, so you can spend less time waiting and more time viewing than ever before. Think about it: all those saved seconds add up. You no longer have to waste time while your TV turns on.

Easy touchpad and motion control for your TV

Using your TV is more intuitive with the Samsung Smart Control. Using the touchpad you can flip between Smart Hub panels and scroll down webpages, and by pointing the remote, you can utilise Motion Control to move the on-screen cursor to navigate and enter text easily. Useful video control keys also help you watch movies, TV and other content you've downloaded or streamed on demand.

Updated Smart View connects your TV, devices and content

ComX Computers

Product Specification Sheet

Samsung's latest Smart View 2.0 app makes it easier to enjoy all your content however you like. Using your home network, you can stream live broadcast TV content to your smartphone or tablet and use your mobile device as a TV remote control. Or you can access and enjoy content on your Smart TV from your smartphone or PC through Smart Hub's Multimedia Panel. It's easy to use, so all you have to do is enjoy.

See your mobile content on a large TV screen quickly and easily

With your new Samsung Smart TV, you can enjoy content from mobile devices on a bigger screen quickly and easily. Samsung's enhanced screen mirroring technology makes the process simple, with no need to change the TV source. Just open the notification panel on your mobile device, select the Screen Mirroring icon and select the TV. That's all you need to do to enjoy apps, games and more on a full-size TV.

Powerful Quad Core processor for faster performance

Thanks to a powerful Quad Core processor, your Samsung Smart TV offers enhanced performance. You'll notice the difference straight away, with faster multitasking and switching between content and web browsing, as well as smoother interaction. With this extra power, your entertainment experience will be so much more enjoyable, with less waiting and more viewing.

All the excitement of the big match with Soccer Mode

Soccer Mode sharply and vividly brings out the green grass of the pitch and all the other colours of the stadium. A powerful multi-surround sound effect also lets you hear all the excitement. Once you turn on Soccer Mode, it will automatically start recording all action on the TV*. And when there's a change in sound, like the roar of the crowd's cheer, or a change in the score, it will know to automatically save the highlights for you to watch later. Play live and recorded matches simultaneously for the ultimate soccer experience at home.

All the excitement of the big match with Soccer Mode

With Soccer Mode, it's like you're actually at the match. It sharply and vividly brings out the green grass of the pitch and all the other colours of the stadium. A powerful multi-surround sound effect also lets you hear all of the excitement. You can even zoom in to selected areas of the screen for a better view. With just a push of a button you can make the most of your favourite sport with all your friends.
