Specifications

About this product

The j5create JUA365 USB 3.0 to Dual HDMI Multi-Monitor Adapter is a compact external graphics adapter designed to add 2 x HDMI displays to a compatible desktop or notebook through a single USB 3.0 connection. It supports one Ultra HD display up to 3840 x 2160 at 30Hz and one Full HD display up to 1920 x 1080 at 60Hz while supporting primary, extended, and mirror display modes. Its aluminum housing provides durability and efficient heat dissipation. Buy now from our website for a simple multi-monitor upgrade with quick delivery in South Africa.

Overview Summary

j5create JUA365 USB 3.0 to Dual HDMI Multi-Monitor Adapter

The j5create JUA365 allows users to connect 2 x HDMI monitors through a single USB 3.0 port without opening the computer or installing an internal graphics card. It is an excellent solution for business users, professionals, home offices, education, and

digital signage where additional screen space improves productivity.

The adapter supports one HDMI output at Ultra HD 3840 x 2160 at 30Hz together with a second HDMI output at Full HD 1920 x 1080 at 60Hz. Support for primary, extended, and mirror display modes makes it suitable for multitasking, presentations, spreadsheets, web browsing, video playback, and office applications. The compact aluminum enclosure and USB-powered design make it ideal for travel and mobile workstations.

Performance tier:Mid-range productivity display adapter

Uses:Multi-monitor workstations, office productivity, business applications, presentations, education, remote work, digital signage, desktop expansion

Overview

The j5create USB 3.0 to Dual HDMI Multi-Monitor Adapter JUA365 acts as an external video card for your MAC or PC. It allows you to add an additional monitor/display through your USB 3.0 port. No need to open up the computer to add an expensive video card, with the USB 3.0 to Dual HDMI Multi-Monitor Adapter you simply load the drivers, plug in the adapter to the USB port, then plug in the HDMI monitor cable into the adapter and you are ready. The USB 3.0 to Dual HDMI Multi-Monitor Adapter supports three viewing modes. Primary mode, allows you to have individual applications open on each monitor, vastly improving productivity. Extended mode allows you to extend your desktop across multiple displays, great for spreadsheets. Mirroring mode is used to clone one screen onto another, ideal for presentations. With "Plug & Play" functionality between your computer and 2nd monitor or projector, you will be able to create a new visual environment in seconds. In addition, j5create has developed this compact design for the sophisticated user who cares about function as well as elegance.

Description

The j5create JUA365 is a USB-powered external graphics adapter that expands the display capabilities of compatible desktop and notebook computers by adding 2 x HDMI outputs through a single USB 3.0 connection. It eliminates the need for internal graphics upgrades while providing a convenient solution for users who require additional monitors.

The adapter supports one Ultra HD display at resolutions up to 3840 x 2160 at 30Hz together with a second Full HD display up to 1920 x 1080 at 60Hz. Users can select primary, extended, or mirror display modes to suit their workflow, making it suitable for multitasking, document editing, financial applications, presentations, monitoring dashboards, and general office productivity.

The compact aluminum enclosure offers durability while helping dissipate heat during continuous operation. The integrated 200mm USB cable simplifies installation and portability, making the JUA365 an excellent addition to mobile professionals, office users, and anyone looking to increase desktop workspace without replacing their computer.
