Symantec Tablet security 2013

Product Overview

Symantec Tablet security 2013 - antiphishing web protection , download threat protection , web-based remote locate / lock , web-based lost notice , web-based sneak peek - retail pack

Specifications

Overview:

Powerful protection for your mobile world and the stuff in it

- Compatible with android smartphones and tablets, iphone and ipad
- Instantly pinpoint your missing device on a map to help you find it fast
- Back up and restore your contacts across your devices
- Help protect android devices against potential privacy risks, malware and phishing

Features:

Protects multiple mobile devices with one easy-to-use web-based service

- Control protection for all of your mobile devices from one convenient website.
- Protects both android smartphones and tablets.
- Remotely locate and back up contacts from your iphone and ipad .

Helps recover your lost or stolen device

- Shows you the location of your missing device on a map to help you find it fast. Also works for iphone and ipad.
- Lets you use the built-in webcam to take a photo of anyone using your webcam-enabled device.
- If you misplace your phone or tablet, you can set off a "scream" alarm to find it fast.
- Lets you display a customizable message to anyone who finds your missing device, so you can make arrangements to get it back.

Stops access of your private information

- Remotely lock your lost or stolen smartphones and tablets through our secure website, so strangers can't use them or access your information.
- Erase the information on your device, if necessary, so your private stuff stays that way.

- Block fraudulent (phishing) websites designed to trick you into revealing personal information that can be used to steal your identity and money.
- Instantly lock your phone if the sim card is removed, so it can't be used with another sim card.

Restores your lost information

- Back up the contacts from your android, iphone or ipad and easily restore them in case you accidentally delete them or get a new device.
- Allows you to share contacts across your iphones, ipads and android devices.

Protects against digital threats

- Neutralizes malware, greyware and other mobile threats.
- Identifies and lets you remove apps that have potential privacy risks, such as leaking your personal information off your device.
- Gives you the power to eliminate mobile spam by blocking unwanted calls and texts.
- Automatically scans downloaded apps and app updates for threats and lets you get rid of them.
- Gives you the option of automatically scanning secure digital (sd) memory cards for threats when you plug them into your mobile device.
