Steel Series Apex 7 Red Switch Mechanical Gaming Keyboard

Product Overview

Steel Series Apex 7 Red Switch Mechanical Gaming Keyboard, OLED Smart Display Integrated Command center with On-the-Fly updates, Aircraft grade Aluminum Alloy top plate for enhanced rigidity, SteelSeries QX2 Mechanical RGB Switches rated for 50 million keypresses, Dynamic Per-Key RGB illumination with millions of Colour options, Dedicated Multimedia controls including clickable Metal Roller and Media Keys, Three-way cable routing channels to prevent stretching and keep Desk tidy, Magnetic Wrist Rest included for full Palm support, N-Key rollover with 100% Anti-Ghosting on 104 Keys

Specifications

Overview Summary:

Upgrade your setup with the SteelSeries Apex 7 Red Switch Mechanical Gaming Keyboard, now available for delivery in South Africa. This premium keyboard features an integrated OLED smart display that shows game stats, media controls, and custom messages without leaving your screen. Built with aircraft-grade aluminum alloy, it offers exceptional durability alongside a magnetic wrist rest for long gaming sessions.

Experience responsive gameplay with fast red mechanical switches rated for 50 million keypresses, plus dynamic per-key RGB illumination that syncs with other SteelSeries gear. The dedicated multimedia roller and customizable profiles let you control volume and lighting instantly. Buy now to secure your high-performance gaming keyboard today.

Performance tier:High-End Gaming

Uses:Competitive FPS, MMO Strategy, Streaming, Content Creation, Home Office Typing

Overview:

The Steel Series Apex 7 with Red Switches, part number 64636, redefines the gaming keyboard experience by blending high-performance mechanical switches with an integrated OLED smart display. This US layout keyboard serves as a command center that keeps vital information at your fingertips, allowing you to adjust settings and view on-the-fly updates without ever having to tab away from your game or application. The sleek design is built around an aircraft-grade aluminum alloy top plate, ensuring the rigidity and structural stability needed for a lifetime of intense gaming sessions while maintaining a premium aesthetic that matches high-end setups.

Description:

The Apex 7 Red Switch model offers a seamless blend of durability and customization for serious gamers. Built with an integrated OLED display, it provides real-time access to game stats like KDA or currency without breaking immersion. The keyboard features durable mechanical switches rated for 50 million keypresses, ensuring consistent performance over time. Its aircraft-grade aluminum frame delivers enhanced stability, while the included premium magnetic wrist rest offers full palm support with a soft touch finish for extended comfort. With dynamic per-key RGB illumination and three-way cable routing, users can design their ultimate setup using SteelSeries Engine software to sync effects across compatible devices.

Features:

- OLED Smart Display for adjusting settings and viewing real-time game stats like KDA and money without tabbing out

ComX Computers

Product Specification Sheet

- Durable mechanical gaming switches guaranteed for 50 million keypresses in red, blue, or brown options
- Aircraft grade aluminum alloy top plate providing enhanced rigidity and structural stability
- Premium magnetic wrist rest with soft touch finish for full palm support during long sessions
- Dedicated multimedia controls including a clickable metal roller for volume and brightness adjustments
- Dynamic per-key RGB illumination with millions of color options and reactive typing effects
- Three-way cable routing to keep desk setups tidy and prevent cable stretching or pulling
- Five onboard profiles for saving custom macros and controlling Prism effects instantly

Design and Build Quality

The physical construction of this keyboard prioritizes both aesthetics and longevity. The Series 5000 metal top plate is crafted from the same aluminum alloy used in jet aircraft, creating a sturdy platform that resists flexing even during vigorous gameplay. This robust frame supports the full 104-key layout with N-Key rollover capabilities, ensuring every keystroke is registered accurately without ghosting or interference. The keyboard includes anti-ghosting technology to guarantee 100% accuracy when pressing multiple keys simultaneously. Weighing in at 2.1 lbs, it offers a substantial feel that stays planted on the desk while maintaining a sleek profile with a height of 40.3 mm and a depth of 139.2 mm.

Switch Specifications

At the heart of the Apex 7 lies the SteelSeries QX2 mechanical RGB switch, designed for speed and precision. The red variant provides a smooth linear action ideal for rapid-fire gaming scenarios. Each switch boasts a total travel distance of 4 mm with an actuation point at 2 mm, allowing for quick responses with minimal finger movement. The force required to activate the keys is set at 45cN, offering a balanced resistance that reduces fatigue over long periods. These switches are engineered to withstand up to 50 million keypresses, ensuring reliable performance whether you are typing documents or engaging in competitive matches.

Connectivity and Software

The Apex 7 is designed for versatility across multiple platforms, supporting Windows, Mac OS X, Xbox, and PlayStation systems via a standard USB port. Configuration and customization are handled through the SteelSeries Engine software, which is widely recognized for its intuitive interface. Version 3.15 or newer is required on Windows (version 7 or later) and Mac OSX (version 10.11 or later). The software unlocks a library of tools including ImageSync, a programmable feature that allows users to create complex lighting effects in seconds. This ecosystem enables you to sync your keyboard with other SteelSeries gear for a cohesive visual experience.

FAQ

What operating systems are compatible with this keyboard?

The SteelSeries Apex 7 supports Windows, Mac OS X, Xbox, and PlayStation, though a USB port is required for connection.

Can I customize the lighting effects on the keys?

Yes, the keyboard features dynamic per-key RGB illumination with millions of color options. You can use SteelSeries Engine software to design custom reactive typing effects or sync colors with other compatible gear.

How durable are the mechanical switches used in this model?

The QX2 Mechanical RGB Switches are guaranteed for 50 million keypresses and feature a 4 mm total travel distance, ensuring they can withstand intense gaming sessions over time.

What features does the OLED Smart Display provide?:

The integrated display serves as an on-board command center that shows useful information such as current KDA, money stats, speaker settings, and messages so you don't have to switch tabs while playing.

Does this keyboard come with a wrist rest or media controls?

Yes, the box includes a premium magnetic wrist rest for full palm support. It also features dedicated multimedia controls including a clickable metal roller for adjusting volume and brightness on the fly.
