

STU-430-CH2

Wacom STU-430 Signature Set & Sign Pro PDF

Product Overview

Wacom STU-430 Signature Set & Sign Pro PDF

Specifications

Overview:

The Signature Pad STU-430 is the ideal solution for anyone looking to get started with digital signature capture for the first time. The fact that it is reasonably priced and robust means that it can stand up to frequent daily use. The STU-430 is a full-featured, monochrome signature pad with a new thin design and a low-profile, flat surface. The 4.5" screen is large enough to capture longer signatures as well as to accommodate soft buttons in addition to the signature area. The transfective LCD is easily readable in varying light conditions.

The Signature Sets use the sign pro PDF application software. This software can be used to electronically capture handwritten signatures and integrate them into PDF documents. The software not only captures the visible image of the signature on the pad or display, it also records the non-visible biometric data such as pressure, movement and speed. Neither the document nor the signature can be modified afterwards and are therefore securely protected. The document can then be saved, printed or sent.

Features:

- Create and sign PDF documents
- Supports Wacom signature tablets and displays, Bamboo and Intuos ranges of pen tablets, as well as Cintiq and PL/DTH/DTK series of pen displays (refer to the compatibility list for exact model denomination)
