

Samsung LS32BM700

Samsung LS32BM700 32" VA UHD 3840x2160 flat Smart Monitor, HDMI *TV license*

Product Overview

Samsung LS32BM700 32" VA UHD 3840x2160 flat Smart Monitor, 300 nits brightness (typical), 3,000:1 contrast ratio static, HDR10, 4ms(gtg) response Time, 178 degree viewing angle (H/V), Max 60Hz Refresh Rate, Tizen Operating System, 2x HDMI, 3x USB Hub, 1x USB-C, 65W USB-C charging Power, WiFi 5, Bluetooth, Speaker, 100x100 Wall Mount *TV license required*

Specifications

Overview:

81.3 cm (32") M7 UHD Smart Monitor with Smart TV Experience (Black)

LS32BM700UW

- Watch, work and chat - all without connecting a separate PC
- Smart TV experience with its embedded TV apps
- PC-less productivity with Samsung DeX, Office 365, Google Duo app, and IoT Hub
- Convenient connectivity with AirPlay, USB type-C, and Auto Source Switch+

Features:

Watch, play, live in style

ComX Computers

Product Specification Sheet

Everything you need is right in your screen. Watch, work and chat - all without connecting a separate PC - with Smart Monitor. Your favorite content, productivity and video call apps are built-in for a simpler and more stylish desk setup that's a joy to use every time.

The monitor screen changes for three times. First is a video with a woman watching a video, and the next is of a woman working. The last one is a video call of a group. At the end, icons overlap over the monitor, and Smart Monitor M7' text appears.

PC-less productivity - Workspace

Experience PC-less. Browse the web, edit documents and work on projects, all without the need for a separate PC. With new Workmode, you can also remotely access another PC, use Microsoft 365 programs and even connect to Samsung mobile devices with Samsung DeX for seamless working.

A monitor sits next to a laptop. Above the monitor, the word 'Home' appears. Above the laptop the word 'Office' appears. The laptop makes a connection with the monitor represented by a cloud icon. After connecting, the content shown on the laptop screen is mirrored on to the monitor screen.

On-screen content simulated for demonstration purpose. Microsoft 365 requires Microsoft account. Wireless DeX supported on selected Galaxy, Note, and Tab devices. Windows 10 Pro, Mac OS 10.5, or higher, and compatible network settings are required for this feature.

Say hey to your pals - SlimFit camera

Jump into any conversation. The SlimFit camera with tilt functionality allows you to create the perfect angle while using your favorite video call apps like Google Duo, which can be accessed directly through the monitor. Plus, the camera cover and option to fully detach always protect your privacy.

Hub for your home, from any room - IoT Hub

Turn your Smart Monitor into a control center for the home by connecting it to your IoT home products with SmartThings. Relax by turning off the lights, pulling down the blinds and setting the thermostat to the perfect temperature all with the Smart Monitor for a perfectly relaxed evening.

Just say what you want - Multiple Voice Assistants

With the Far Field Voice feature, activate your voice assistant just by speaking. Directly command the monitor - even at a distance - and tell it what you need. It's as simple as that. The Smart Monitor supports both Bixby and Amazon Alexa.

Content on the big screen made easy - Mobile connectivity

Convenient connectivity. With AirPlay integration, you can wirelessly connect Apple devices to the Smart Monitor and view on a bigger screen. Enjoy your favorite content from an iPhone, iPad, and Mac on the Smart Monitor and even mirror apps, documents, and websites.

A smartphone and monitor sit side-by-side. The smartphone shows a woman posing with a skateboard. The same woman with skateboard is shown on the monitor. The smartphone's gallery app swipes through different photos which are also shown on the monitor screen.

Enjoy Contents in vivid detail - UHD

Astonishing picture quality for work and play. With 4x the pixels of Full HD, the Smart Monitor delivers more screen space and amazingly life-like UHD images. By day, see more documents at once. And, in the evening, watch movies in cinematic 4K quality.

A busy city center with people walking around is very dimly lit. A box zooms into the clock which then shows a comparison of the image with FHD and UHD. A wave of pixels then rushes over the scene and creates a more vivid, clearer video quality in UHD.

Optimal brightness, optimum enjoyment - Adaptive Picture

Sensational picture, day or night. Surrounding light is detected by a sensor to adjust brightness automatically with Adaptive Picture. Even in broad daylight, watch dark, gritty dramas without squinting and straining your eyes to see the picture.

Rich sound, real experiences - Adaptive Sound

With built-in speakers, the M7 provides rich and realistic sounds for a more immersive experience overall. Plus, the Adaptive Sound feature adjusts sound based on a range of content situations, from speech to music to ambient noise, delivering more refined and enjoyable sounds for every listener.

Connect with convenience - USB type-C

The USB type-C port enables you to power up, transmit data, and even send display signals between devices with just one connection. Its single connection architecture brings an enjoyable work environment that's both clutter-free and stress-free.

Reveal the game's hidden sides - Ultrawide Game View

Keep your eye on the win. Adjust your screen to 21:9 to discover hidden areas in game scenes with Ultrawide Game View. Now when you play soccer games, see more of the pitch right up to the goalposts. And in driving games, get a natural and encompassing view of the road ahead.

Availability limited to source devices which support 21:9 output. May function differently depending on game or content being viewed.

A video game plays on a monitor screen. A robot walks through a military zone. The screen is then stretched from a 16:9 ratio to a 21:9 ratio. As a part of the expanded area on the right side, a guard is shown close to the robot. The robot then targets the guard with a yellow crosshairs icon.

Plug and see - Auto Source Switch +

No more switching around. With Automatic Source Switch Plus, your monitor detects newly connected devices as soon they're plugged in, and displays the correct signal. No more searching for the right input on the menu.
