Goldtool Coax Cable Mapper 4 ID Finder with Toner

Product Overview

Goldtool Coax Cable Mapper 4 ID Finder with Toner - Handheld testing device designed for CATV and Security Installers, Retail Box.

Specifications

About this product

The Goldtool Coax Cable Mapper 4 ID Finder with Toner (TCT-124) is a handheld testing device ideal for CATV and security installers. It allows technicians to quickly troubleshoot, map, and identify multi-run coaxial cable systems. Buy now from our site for an essential coax testing tool.

With four unique identifier test terminators and a tone generator, this tool ensures accurate mapping of coaxial cable installations. Shop now from our online store to simplify testing and maintenance tasks for TVs, monitors, security cameras, routers, and splitters.

Overview Summary

Product Title:Goldtool Coax Cable Mapper 4 ID Finder with Toner TCT-124

The TCT-124 Coax Cable Mapper is designed to test multi-run coaxial cables terminated with F or BNC connectors. It produces a tone signal that can be traced using an audio frequency toner tracer, enabling technicians to identify and map each cable run efficiently.

This handheld device features visual and audio alerts for OPEN/SHORT conditions and displays PASS when cables are functioning correctly. Its compact design includes storage for ID finders at the bottom of the unit, making it convenient for on-site use.

Performance tier:Professional / Installer

Uses:Coax cable troubleshooting, mapping, CATV installations, security camera setup, router and splitter cable testing

Description

The Goldtool TCT-124 Coax Cable Mapper is a precision tool for technicians installing or maintaining CATV and security systems. It allows easy identification of individual coax cable runs with four unique identifiers and provides both visual and

Product Specification Sheet

audio alerts for cable faults.

Equipped with a tone generator and a convenient ID finder storage compartment, the mapper simplifies the process of troubleshooting, mapping, and verifying coaxial connections in TVs, monitors, security cameras, routers, and splitters. Its lightweight design makes it ideal for professional installers who need a portable, reliable tool.

Features

- Handheld coax cable mapper with 4 unique ID finders
- Tone generator for tracing and identifying cables
- Visual and audio alerts for OPEN/SHORT conditions
- Displays PASS when cables are functioning correctly
- Battery low indicator for reliable field use
- Compact design with storage for ID finders
- Suitable for CATV and security cable installations

What's in the Box

- 1 x Goldtool Coax Cable Mapper TCT-124
- 4 x Unique Identifier Test Terminators
- 1 x Audio Frequency Toner
- 1 x Carrying Pouch / Storage Compartment

Specifications

- Product Code: TCT-124
- Brand: Goldtool
- Weight: 0.35 kg
- Dimensions: 20 x 10 x 5 cm
- Functions: Cable mapping, fault detection, tone generation
- Compatibility: F-type and BNC coaxial cables
- Indicators: Visual and audio alerts, PASS display, battery low indicator
- Applications: TV, monitor, security camera, router, and splitter cable testing
- Portability: Handheld with storage for ID finders

FAQ

Can the TCT-124 mapper test multiple coax cables simultaneously?

Yes, it comes with four unique identifier test terminators to identify and map multiple cable runs at once. Delivery is available throughout South Africa, with collection options in South Africa, Zimbabwe, Namibia, and Mozambique.

Does it provide alerts for cable faults?

Yes, the device gives visual and audio alerts for OPEN or SHORT conditions, ensuring accurate cable testing.

Is this tool portable for on-site work?

Absolutely, it is lightweight and handheld with a built-in storage compartment for ID finders.
