

Aqara Smart Lock U200 Kit

Upgrade to keyless living with the Aqara Smart Lock U200 Kit, which installs easily over your existing lock without drilling. This smart lock supports various entry methods like fingerprint, NFC, passcode, and more, and integrates with Apple home keys. Compatible with Matter, it's managed via the Aqara Home app and is built to last with a six-month battery life and IPX5 waterproof rating, making it ideal for both indoor and outdoor use.

- Apple home keys & Various Unlocking Methods:** The U200 offers a variety of convenient unlocking methods, including Apple Home Keys (requires Apple 2-in-1 Matter controller & Border Router), fingerprint**, password, NFC *, and more. You can control the door lock using the app, either through integrated Bluetooth or via Thread for remote access. Additionally, it supports temporary passwords, such as one-time and periodic passwords, for easy sharing with others. The device also accommodates mechanical keys for emergencies.
- Advanced Software Control:** The U200 enhances home entry with Quiet Unlock Mode, automatic alerts, and hands-free unlocking, ensuring security and peace of mind through features like the Activity Log, automatic locking, and Anti-peep Pin Code Protection****. It offers flexibility with Passage Mode, temporary passwords including offline passwords (One-Time Passwords), and periodic passwords*** available in the Aqara Home App, along with Do Not Disturb Mode.
- Native Matter Support over Thread:** The U200's Matter over Thread support ensures it seamlessly integrates with top smart home systems like Apple Home and Google Home, enhancing user convenience through extended battery life and efficient remote management. *****
- Rechargeable Battery & Multi-Power Options:** The U200's advanced engineering includes IPX5 waterproofing, an operational range from -15°C to 66°C, and multiple power sources: rechargeable Li-Ion for the door lock(up to 6 months*****), AAA batteries for the keypad*****, and hard-wired capability. This ensures durable, reliable performance and adaptability to various environmental challenges.
- Easy Installation & Wide Compatibility:** Easily upgrade your home security with the U200's hassle-free installation, which fits over your existing door lock without any drilling or modifications. This straightforward solution enhances security with minimal effort, compatible with Euro profiles and select Scandi cylinders.(Note: Please verify compatibility with your door before making a purchase.)*****
- Enhanced Security Features:** The U200 uses the AES encryption algorithm and fingerprint module encryption binding, ensuring top-level security for your personal data and access points, making it a reliable and trustworthy choice for home security.

Disclaimers:

* NFC cards will only be available in certain models (Smart Lock U200 Kit).

** Can be configured locally on the lock itself by pressing the confirm button for 3 seconds using the Admin's password.

*** Settings can only be adjusted via direct Bluetooth connection.

**** Anti-peep pin code protection is also supported for the safety. Any digits can be input before and after the actual code.

***** Upon release, U200 will support integration with Apple Home, Google Home, and Amazon Alexa Matter controllers. Compatibility with Samsung SmartThings controllers is planned to be introduced shortly thereafter.

***** Performance based on up to 8 daily unlocking and locking actions via fingerprint/NFC.

***** AAA batteries are not rechargeable, and a hardwired setup requires a 12V-24V AC or DC power supply.

***** A locking cylinder equipped with this feature enables it to be unlocked from the outside using a key, even if another key is already inserted on the inside. The U200 is specifically designed for compatibility with cylinders that offer this capability.

Automations:

1	Heading	Home Automation for Remote Door Control with U200
	IF THEN	IF Wireless Mini Switch T1 is pressed THEN Unlock the U200
	Description	This is an automation that allows you to remotely control the U200 door opening from within your home. When you are busy with household chores and can't get to the door to unlock it, or when you don't have your phone with you, you can use the wireless mini switch T1 to remotely control the U200 for precise convenience.
	Devices	Smart Lock U200 + Hub M3 + Wireless Mini Switch T1
